Alternative Sentencing in the Federal Criminal Justice System Courtney Semisch Increasingly, criminal justice professionals have argued that dwindling prison space should be reserved for the most serious and dangerous offenders, necessitating a reconsideration of alternative sanctions for first-time and nonviolent offenders. This paper analyzes alternative sentences for federal offenders and, specifically, United States citizens sentenced under various types of alternatives. This analysis describes current federal sentencing policy governing alternative sentences and examines offenders with alternative sentences using the United States Sentencing Commission's data. An analysis of factors associated with alternative sentences imposed for eligible offenders provides insight into considerations made by federal sentencing courts in determining whether to impose alternatives. Digital Personalized Health and Medicine L.B. Pape-Haugaard 2020-06-17 Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.

The Future of the Past Tamara Bray 2012-10-12 To date, the notion of repatriation has been formulated as a highly polarized debate with museums, archaeologists, and anthropologists on one side, and Native Americans on the other. This volume offers both a retrospective and a prospective look at the topic of repatriation. By juxtaposing the divergent views of native peoples, anthropologists, museum professionals, and members of the legal profession, it illustrates the complexity of the repatriation issue.

International Financial Statistics, September 2018 International Monetary Fund. Statistics Dept. 2018-09-04 This monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis.

Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.

Buraimi Michael Quentin Morton 2014-05-09 Buraimi is an oasis in an otherwise bleak desert on the border between Oman and the UAE. In the early twentieth century, it shot to notoriety as oil brought the world's attention to this corner of the Arabian Peninsula, and the ensuing battle over energy resources between regional and global superpowers began. In this lively account, Michael Quentin Morton tells the story of how the power of oil and the conflicting interests of the declining British Empire and the United States all came to a head with the conflict between Great Britain and Saudi Arabia, shaping the very future of the Gulf states. The seeds of conflict over Buraimi were sown during the oil negotiations of 1933 in Jeddah, where the international oil companies vied for control of the future industry in the Arabian Peninsula. As a result of lengthy discussions, including the efforts of men such as St John Philby and Ibn Saud himself, the Saudis granted an oil concession for Eastern Arabia without precisely defining the geographical limits of the area to be conceded. Matters came to a head in 1949 when Saudi Arabia made claim to the territory, and Great Britain, acting on behalf of Oman and Abu Dhabi, challenged the actions of the Saudis. Attempts at arbitration failed, and only one year before Britain's defeat over the Suez Canal, Britain expelled Saudi Arabia from the oasis. In the wake of Britain's withdrawal 'East of Suez' in the early 1970s, the dispute was apparently solved between Saudi Arabia and the UAE. But whilst the controversy dominated Anglo-Saudi relations for more than 30 years, it still casts its shadow across the Gulf today, threatening to expose the fragility of the West's ever-present dependency on the region for its supply of oil. Morton brings a range of historical figures to life, from the American oilmen arriving in steamy Jeddah in the 1930s, to the rival sheikhs of Buraimi itself competing for power, wealth and allegiances as well as the great players in world politics: Churchill, Truman and Ibn Saud. This entertaining and thoroughly researched book is both a story of a decisive conflict in the history of Middle East politics and also of the great changes that the discovery of oil brought to this previously desolate land.
