Kleidung zieht jeden an Julia Schnaus 2017-11-20 Anfang des 20.

Jahrhunderts beschäftigte die deutsche Bekleidungsindustrie etwa 1,3 Millionen Erwerbstätige. Die produzierte Kleidung konnte nicht nur den heimischen Markt versorgen, sondern auch in großem Maß exportiert werden. Heute bietet sich ein ganz anderes Bild: 2014 arbeiteten in der deutschen Bekleidungsindustrie nur noch ca. 27.000 Menschen in etwa 150 Betrieben. Die Produktion findet bis auf wenige Ausnahmen im Ausland statt. Die vorliegende Arbeit, die eine von der wirtschaftshistorischen Forschung bisher vernachlässigte Branche betrachtet, geht der Frage nach, wie es zu einem solch tiefgreifenden Strukturwandel kam und untersucht die Entwicklung der deutschen Bekleidungsindustrie von der Weimarer Republik – in der zunehmend „Kleiderfabriken“ entstanden und man von einer „Industrie“ im eigentlichen Sinne sprechen kann – bis zum Niedergang der Branche in den 1960er-/1970er-Jahren mit der Verlagerung der Fertigung ins Ausland. Die Studie geht sowohl auf der Branchen- als auch auf der Unternehmensebene Fragen zu Kontinuitäten und Brüchen sowie wirtschaftlichen und politi-

schen Einflüssen nach. Beschrieben werden Handlungsspielräume und Reaktionen der Unternehmen aus unterschiedlichen Bereichen der Branche.

Malware Analysis Using Artificial Intelligence and Deep Learning Mark Stamp 2020-12-20 This book is focused on the use of deep learning (DL) and artificial intelligence (AI) as tools to advance the fields of malware detection and analysis. The individual chapters of the book deal with a wide variety of state-of-the-art AI and DL techniques, which are applied to a number of challenging malware-related problems. DL and AI based

approaches to malware detection and analysis are largely data driven and hence minimal expert domain knowledge of malware is needed. This book fills a gap between the emerging fields of DL/AI and malware analysis. It covers a broad range of modern and practical DL and AI techniques, including frameworks and development tools enabling the audience to innovate with cutting-edge research advancements in a multitude of malware (and closely related) use cases.
