Clinical Decision Making for Adult-Gerontology Primary Care Nurse Practitioners Joanne Thanavaro 2016-03-15
Clinical Decision Making for Adult-Gerontology Primary Care Nurse Practitioners provides a unique approach to clinical decision making for a wide variety of commonly encountered primary care issues in adult and geriatric practice. This text combines guidelines for the ANP/GNP role and case studies with real life practice examples, as well as a series of practice questions to help reinforce learning. The text is designed for both the Nurse Practitioner student as well as the newly practicing NP to help increase confidence with application of assessment skills, diagnostic choices and management approaches. The theory behind this text is to enable students to learn a systematic approach to clinical problems as well as apply evidence-based guidelines to direct their management decisions. *Clinical Decision Making for Adult - Gerontology Primary Care Nurse Practitioners* is also appropriate for Nurse Practitioners preparing to take the ANP/GNP certification exam as it features summaries of evidence-based guidelines. Faculty may also use the text to incorporate a case study approach into their courses either for classroom discussion or as assignments to facilitate clinical decision making. The inclusion of "real life" cases simulate what NPs will actually encounter in their clinical practice environments. Key

The World Muslim Population Houssain Kettani 2019-11-08
The birth of Islam over fourteen centuries ago was a monumental event in human history with an everlasting effect on humanity. For centuries, researchers have contemplated the growth and distribution of Muslims throughout the world. This book presents a reliable estimate of the world Muslim population since the inception of Islam at the start of the seventh century to the end of the twenty-first century. In this book, the world is divided into five continents, each of which is further divided into non-overlapping regions, and these in turn are divided into current countries. A centennial data estimate for each region and current country from 600 AD to 2100 AD (approximately 1 H to 1500 H) of the total population, and the corresponding Muslim population and

its percentage are provided. Furthermore, the same data in decennial order from 1790 to 2100 (or 1210 H to 1520 H) are provided for each region and country. These data are summarized to be an accurate reference for other studies and discussions related to the Muslim population. Written for demographers, researchers, historians, as well as general readers, this book is an essential reference to all aspects of the world Muslim population.
