Solar Photovoltaic Power Optimization Michael Ginsberg 2019-10-08

This book focuses on the rapidly maturing solar photovoltaic (PV) industry, which is achieving an ever-increasing share of U.S. and global power production. There is a growing need for all stakeholders – owners, maintenance technicians, utilities, and installers – to fully understand the operations and maintenance of PV systems, and how to monitor and diagnose systems post installation. Recognizing this need, this book covers monitoring and diagnostic techniques and technologies, including how to identify the causes of poor performance, and measure and verify power production. Drawing on global case studies, it details how to achieve optimal PV power output in the field through an overview of basic electrical, the solar PV module and Balance of System, and processes and software for monitoring, measurement, and verification. It also provides an overview of the North American Board of Certified Energy Practitioner's (NABCEP) new PV System Inspector credential, which will be outlined in the final chapter. Equipping the reader with the knowledge and confidence required to maximize the output of solar PV installations, *Solar Photovoltaics Power Optimization* will be an essential resource for PV practitioners and students.

Millennials in America 2017 Robert L. Scardamalia 2017-10-06 This publication provides a wide range of characteristics profiling the demographic, social, and economic status of the Millennial generation. While the Baby Boom generation occupies much of our social and political dialogue, the Millennial generation is actually a larger generation. As the Boomers age, their numbers will decrease while the Millennials will be the driving social and political force in the coming decades. *Millennials in America* focuses on the those born between 1982–2001. *Millennials in America* is an invaluable source for helping people understand what the census data tells us about who we are, what we do, and where we live. Benefits of this publication include: It will fill an information gap due to the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system. Users will have comparative data in a single reference volume. It will eliminate the need for the data user to understand and manipulate detailed census data files and consolidate disparate tables in AFF. This publication utilizes the PUMS data which is the ONLY source of data that can be used to define precise age ranges for the Millennial generation. The age detail available for census summary data simply aren't adequate for defining the Millennials and therefore prohibit compilation of characteristics specific to this important generation. Features of this publication include: Detailed data on 11 subject areas including race, educational attainment, field of study, income, mobility status, employment status, housing, and more Each subject area includes data for the United States, the 50 states and the District of Columbia, 622 counties, 331 cities, 381 metropolitan areas and 34 micropolitan areas. Each part is preceded by highlights, maps, and figures illustrating how areas diverge from the national norm as well as differences among areas.

Millennials in America 2019 Robert L. Scardamalia 2019-08-09 This completely updated third edition of *Millennials in America* provides a wide range of characteristics profiling the demographic, social, and

economic status of the millennial generation.

Aging in America 2020 Robert L. Scardamalia 2020-08-05 Today, concerns about the financial stability of Social Security, trends in disability, health care costs, and the supply of caregivers are all driven by the coming explosion in the number of people over the age of 65. *Aging in America* focuses on the economic and demographic portrait of the senior population and can provide a context for analysis of broader population issues. It provides a wide range of characteristics of the older population including: age composition, race and Hispanic origin, educational attainment, living arrangements, veteran status, employment and income, health insurance, disability and housing characteristics. Extracting comparative information from the Census Bureau's databases can be difficult and time-consuming. *Aging in America* provides comparative data on a variety of topics in a single, easy-to-use volume. Some of the benefits of *Aging in America* include: It provides a cross-section of socio-economic characteristics focused on the aging population for commonly researched geographic areas: states, counties, cities, metropolitan and micropolitan areas, and congressional districts The tables are structured to allow easy comparisons across geographic areas and easy profiling of characteristics

Families in America Deirdre A. Gaquin 2015-12-24 *Families in America* presents a wide selection of information from the American Community Survey that helps us describe American living arrangements, relationships, marriages, births, children, and incomes. Each section includes a large selection of information for the United States, the 50 states, and the District of Columbia. This is followed by a more limited selection of data for 381 metropolitan areas, 980 counties with populations of 50,000 or more, and 795 cities with populations of 50,000 or more. *Families in America* will include details about both family and nonfamily households and includes topics such as multi-generational households, same-sex partner households, grandchildren living with grandparents, and nonrelatives in family households. In addition, information related to age, sex, race, Hispanic origin, income, poverty, and health insurance for various household types is included.
