**Encyclopedia of Traditional Chinese Medicines - Molecular Structures, Pharmacological Activities, Natural Sources and Applications** Jiaju Zhou 2011-02-21 This set of six volumes provides a systematic and standardized description of 23,033 chemical components isolated from 6,926 medicinal plants, collected from 5,535 books/articles published in Chinese and international journals. A chemical structure with stereo-chemistry bonds is provided for each chemical component, in addition to conventional information, such as Chinese and English names, physical and chemical properties. It includes a name list of medicinal plants from which the chemical component was isolated. Furthermore, abundant pharmacological data for nearly 8,000 chemical components are presented, including experimental method, experimental animal, cell type, quantitative data, as well as control compound data. The seven indexes allow for complete cross-indexing. Regardless whether one searches for the molecular formula of a compound, the pharmacological activity of a compound, or the English name of a plant, the information in the book can be retrieved in multiple ways.

**Spectroscopic Data of Steroid Glycosides** Viqar Uddin Ahmad 2010-05-07 This book is an essential reference guide to spectroscopic, physical and biological activity data of over 3500 steroid glycosides, offering the structures and the data of the naturally occurring glycosides of steroids. All compounds are arranged according to the structure of the aglycone, and, in its own class, by the increasing molecular weight, making Spectroscopic Data of Steroid Glycosides extremely useful for the structure elucidation of new natural products, particularly glycosides.

**Dictionary of Steroids** R.A. Hill 1991-05-23 This dictionary, the first extensive compilation since Fieser's Steroids in 1959, is one of a uniform series derived from the Chapman and Hall Chemical Database. For the first time bibliographic, structural and chemical data on over 10,000 of the most important steroids has been brought together to provide an invaluable reference work for chemists working in this field. The dictionary documents all known naturally occurring steroids (sterols, bile acids, sapogenins, cardanolides, bufanolides, steroidal alkaloids) and an extensive selection of the most important synthetic and semisynthetic steroids. The presentation of data is uniform with the established Dictionary of organic compounds, fifth edition, with accurately drawn diagrams showing stereochemistry and comprehensive, labelled bibliographies giving rapid access to primary literature sources. A small proportion of entries are based on entries in the Dictionary of organic compounds which have been substantially expanded and brought up to date with references to the recent literature (coverage up to August 1990). The majority are wholly new with particularly strong natural product coverage. Access to this information is provided by name, molecular formula, CAS registry number, type of compound, and species indexes--which comprise Volume 2. **Modern Iran** Ali Ansari 2014-07-22 Today's Iran is rarely out of the headlines. Labelled by George W Bush as a part of his 'axis of evil' and perceived as a real nuclear threat by some, Iran is increasingly seen as an enemy of the West. And yet for many Iran remains shrouded in mystery and incomprehensible to Western analysis. Modern Iran offers a comprehensive analysis and explanation of political, social and economic developments in Iran during the 20th century. Since it first published in 2003 Modern Iran has become a staple for students and lecturers wishing to gain a clear understand of the history of this strategically important Middle Eastern Country. The new edition will bring us up to date and will include: an analysis of the successes and failures of the Khatami Presidency; an examination of the effect of 9/11; the rise of the Reform Movement and the efforts to promote Islamic Democracy; the resistance to democratisation among the hardline elites.

*Modern Iran since 1797* Ali Ansari 2019-03-26 Modern Iran since 1797 offers a comprehensive analysis of political, social and economic developments in Iran since the end of the eighteenth century. Spanning two centuries, the book provides historical context for Iran's international relationships and its internal struggle to reconcile itself and its traditions with the modern world. The book presents an overview of this crucial period in Iran's history, its emergence from the political turmoil of the eighteenth century through to its initial encounter with the industrial powers of Europe and its attempts to navigate the turbulent waters of European imperialism. It assesses the impact of European ideas on the triumph and tragedy of the Constitutional Revolution, which established the political template for the country going forward and against which all other political developments have been measured. This new edition has been updated to incorporate new scholarship and research to make a rounded assessment of recent developments and bring the text fully up to date. A substantive new prequel has also been added, covering the long nineteenth century from 1797 through to 1921, including a fuller and more detailed treatment both of the Constitutional Revolution and the events and ideology that underpinned it. Written in a clear, engaging style and highlighting Iran as a state and society grappling with the realities of the modern age, Modern Iran since 1797 remains the perfect guide for all those studying the history of modern Iran.
