Bronze Age Settlement and Land-Use in Thy, Northwest Denmark

(Volume 1 & 2) Jens-Henrik Bech 2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape, settlements and households during the period 1500-1100 BC. Bordering the North Sea to the west, and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research (pollen and palaeobotanical analyses) with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for students and researchers of the Bronze Age alike.

Handbook of Thermal Conductivity of Liquids and Gases Natan B. Vargaftik 1993-10-25 Handbook of Thermal Conductivity of Liquids and Gases covers practically all of the data available on the thermal conductivity of pure liquids and gases. Thermal conductivity data included in the book is based on original experimental measurements and correlations recommended or adopted as a standard by the National Standard Reference Data Service of the Russian Federation. New tabulations of thermal conductivity data on high-molecular organic fluids and the alkali metals in both liquid and gaseous states are featured as

well. This book will be an important reference for all researchers working in thermodynamics.
