*Crystals in Art* Lauren Haynes 2019-10-11 Based on an exhibition organized by Joachim Pissarro and curator of contemporary art at Crystal Bridges Museum of American Art, Lauren Haynes, *Crystals in Art: Ancient to Today* explores the complex and varied connections between crystal and art throughout the world. Included are both ancient artifacts—such as engraved gems, figurines, and vases—and works from contemporary artists around the world that explore the power of crystal in art by drawing on its form, properties, and mysterious qualities. Featuring more than sixty-five works from ancient Egypt and Greece, through to Rome, China, India, Japan, the Middle East, the Americas, and beyond, this book invites readers to discover how the power of crystal transcends the boundaries of time and space. Taken together, all of these objects illustrate how crystal has bridged the gap between things we can see and things we can't: science and art, fact and faith, medicine and magic—the visible and the invisible. Published in collaboration with Crystal Bridges Museum of American Art and University of Arkansas School of Art.

Publications 2002 Americans see water as abundant and cheap: we turn on the faucet and out it gushes, for less than a penny a gallon. We use more water than any other culture in the world, much to quench what's now our largest crop--the lawn. Yet most Americans cannot name the river or aquifer that flows to our taps, irrigates our food, and produces our electricity. And most don't realize these freshwater sources are in deep trouble. Blue Revolution exposes the truth about the water crisis--driven not as much by lawn sprinklers as by a tradition that has encouraged everyone, from homeowners to farmers to utilities, to tap more and more. But the book also offers much reason for hope. Award-winning journalist Cynthia Barnett argues that the best solution is also the simplest and least expensive: a water ethic for America. Just as the green movement helped build awareness about energy and sustainability, so a blue movement will reconnect Americans to their water, helping us value and conserve our most life-giving

resource. Avoiding past mistakes, living within our water means, and turning to "local water" as we do local foods are all part of this new, blue revolution. Reporting from across the country and around the globe, Barnett shows how people, businesses, and governments have come together to dramatically reduce water use and reverse the water crisis. Entire metro areas, such as San Antonio, Texas, have halved per capita water use. Singapore's "closed water loop" recycles every drop. New technologies can slash agricultural irrigation in half: businesses can save a lot of water--and a lot of money--with designs as simple as recycling air-conditioning condensate. The first book to call for a national water ethic, Blue Revolution is also a powerful meditation on water and community in America.
