*Applications of RNA-Seq and Omics Strategies* Fabio Marchi 2017-09-13 The large potential of RNA sequencing and other "omics" techniques has contributed to the production of a huge amount of data pursuing to answer many different questions that surround the science's great unknowns. This book presents an overview about powerful and cost-efficient methods for a comprehensive analysis of RNA-Seq data, introducing and revising advanced concepts in data analysis using the most current algorithms. A holistic view about the entire context where transcriptome is inserted is also discussed here encompassing biological areas with remarkable technological advances in the study of systems biology, from microorganisms to precision medicine.

**British Steam: BR Standard Locomotives** Fred Kerr 2012-11-19 After WWII the existing railway companies were all put into the control of the newly formed British Transport Commission and that government organization spawned British Railways, which came into being on 1st January 1948. The railway infrastructure had suffered badly during the war years and most of the steam locomotives were 'tired' and badly maintained and or life expired. Although the management of British Railways was already planning to replace steam power with diesel and electric engines/units they still took a decision to build more steam locomotives (as a stop gap). Some 999 (yes just 1 short) Standard locomotives were built in 12 classes ranging from super powerful express and freight engine to suburban tank locomotives. The locomotives were mainly in good order when the order came in 1968 to end steam, some only 8 years old. There still exists a fleet of 46 preserved Standards of which 75% are in working order in and around the UKs preserved railways, furthermore 3 new build standard locomotives are proposed. Steam fans who were around in the 1960s all remember the 'Standards'.

**Montgomery Ward Catalogue of 1895** Montgomery Ward & Co. 1969-08-01 Tea gowns, bleached damask, and yards of flannel and pillow-case lace, stereoscopes, books of gospel hymns and ballroom gems, the New Improved Singer Sewing Machine, side saddles, anti-freezing well pumps, Windsor Stoves, milk skimmers, straight-edged razors, high-button shoes, woven cane carpet beaters, spittoons, the Studebaker Road Cart, commodes and washstands, the "Fire Fly" single wheel hoe, cultivator, and plow combined, flat irons, and ice cream freezers. What man, woman, or child of the 1890s could resist these offerings of the Montgomery Ward catalogue, the one book that was read avidly, year after year, by millions of Americans on farms and in small towns across the nation? The Montgomery Ward catalogue provides one of the few irrefutably accurate pictures of what life was "really like" in the gay nineties, for it described and illustrated almost anything that anybody could possibly need or want in the way of "store-bought" goods. In fact, in that pre-department store era, it was usually the only source for such goods. Imagine if Montgomery Ward had issued an illustrated catalogue in the days of Louis XIV, or Elizabeth I, or Charlemagne: what insights would we have into the daily life of the "common folk," the farmers and shopkeeper,

housewives and schoolchildren . . . what sources of information for historians and scholars, collectors and dealers, what models for artists and designers. In 1895, Montgomery Ward was the oldest, largest, and most representative mail-order house in the country. The brainchild of a former traveling salesman, it issued its first catalogue in 1872, a one-page listing of items. By 1895, the catalogue, reprinted here, had grown to 624 pages and listed some 25,000 items, almost all of them illustrated with live drawings. Montgomery Ward was by then a multi-million dollar business that profoundly affected the American economy; and since it reached the most isolated farms and backwoods cabins, its effect on American culture was almost as great. Now once again available, it is our truest, most unbiased record of the spirit of the 1890s. An introduction on the history of the Montgomery Ward Company and its catalogue has been prepared especially for this edition by Boris Emmet, Ph.D. (Johns Hopkins), a foremost expert on retail merchandising. His monumental work Catalogues and Counters has long been recognized as a landmark in the study of American economic history.

**Surfactants in Upstream E&P** Theis Solling 2021-06-19 This edited book explores the use of surfactants in upstream exploration and production (E&P). It provides a molecular, mechanistic and application-based approach to the topic, utilising contributions from the leading researchers in the field of organic surfactant chemistry and surfactant chemistry for upstream E&P. The book covers a wide range of problems in enhanced oil recovery and surfactant chemistry which have a large importance in drilling, fracking, hydrate inhibition and conformance. It begins by discussing the fundamentals of surfactants and their synthesis. It then moves on to present their applicability to a variety of situations such as gas injections, shale swelling inhibition, and acid stimulation. This book presents research in an evolving field, making it interesting to academics, postgraduate students, and experts within the field of oil and gas.
