Crust–Mantle Interactions and Granitoid Diversification J. Halla 2017-03-01 This Special Publication sheds light on crust formation and tectonic processes in early Earth by focusing on Archaean granitoids and related rocks from West Greenland in the North Atlantic Craton, Karelia Province of the Fennoscandian Shield, Eastern Dharwar and Bundelkhand cratons in the Indian Shield and Bug Complex of the Ukrainian Shield. Resulting from the IGCP-SIDA 599 project 'The Changing Early Earth', this compilation of papers provides explanations on the nomenclature of Archaean granitoids and explores the petrology, element and isotope geochemistry, geochronology and metamorphism of granitoids and supracrustal rocks of variable metamorphic grade. This volume provides information on the increase and timing of crust-mantle interactions and granitoid diversification from early Archaean protoliths of island arc origin to the emergence of multi-source high-K calc-alkaline granitoid batholiths at convergent continental margins. The formation of abundant granitoid batholiths suggests a significant change in mantle dynamics and plate tectonics towards the end of the Archaean.

International Education and the Next-Generation Workforce Victor C. X. Wang 2013-08 Education is the first stage in developing a viable, dynamic, and long-lived global economy. Unfortunately, in times of economic hardship, educational programs, teacher salaries, and extracurricular opportunities are often the first to be cut. International Education and the Next-Generation Workforce: Competition in the Global Economy presents a detailed discussion of present educational principles and policies, and their impact on the effectiveness of education in a multi-national context. The chapters in this pivotal reference contribute to the body of literature bridging the gap between the fields of business and education, providing educators and business professionals at all levels with an instruction manual for the next generation of employment-focused teaching and learning.
