**SAS Programming with Medicare Administrative Data** Matthew Gillingham 2014-05-01 SAS Programming with Medicare Administrative Data is the most comprehensive resource available for using Medicare data with SAS. This book teaches you how to access Medicare data and, more importantly, how to apply this data to your research. Knowing how to use Medicare data to answer common research and business questions is a critical skill for many SAS users. Due to its complexity, Medicare data requires specific programming knowledge in order to be applied accurately. Programmers need to understand the Medicare program in order to interpret and utilize its data. With this book, you'll learn the entire process of programming with Medicare data—from obtaining access to data; to measuring cost, utilization, and quality; to overcoming common challenges. Each chapter includes exercises that challenge you to apply concepts to real-world programming tasks. SAS Programming with Medicare Administrative Data offers beginners a programming project template to follow from beginning to end. It also includes more complex questions and discussions that are appropriate for advanced users. Matthew Gillingham has created a book that is both a foundation for programmers new to Medicare data and a comprehensive reference for experienced programmers. This book is part of the SAS Press program.

**The Law of Air Warfare** Natalino Ronzitti 2006 This book is the outcome of a research project directed by Natalino Ronzitti, to explore the current status and future prospects of international humanitarian law of air warfare. This is achieved through the analysis of international customary law, the conventional provisions in force and the most recent State practice. As the most recent conflicts suggest, air warfare has known an exponential growth. However, even a rapid analysis of the international humanitarian law applicable to air warfare shows a defective and fragmentary situation. This book will fill the current gap that exists in legal literature and will critically review and evaluate recent State practice.
