**Probing the Ethics of Holocaust Culture** Claudio Fogu 2016-10-17 Probing the Ethics of Holocaust Culture is a reappraisal of the controversies that have shaped Holocaust studies since the 1980s. **Pakistan's Political Parties** Mariam Mufti 2020-05-01 Pakistan's 2018 general elections marked the second successful transfer of power from one elected civilian government to another—a remarkable achievement considering the country's history of dictatorial rule. Pakistan's Political Parties examines how the civilian side of the state's current regime has survived the transition to democracy, providing critical insight into the evolution of political parties in Pakistan and their role in developing democracies in general. Pakistan's numerous political parties span the ideological spectrum, as well as represent diverse regional, ethnic, and religious constituencies. The essays in this volume explore the way in which these parties both contend and work with Pakistan's military-bureaucratic establishment to assert and expand their power. Researchers use interviews, surveys, data, and ethnography to illuminate the internal dynamics and motivations of these groups and the mechanisms through which they create policy and influence state and society. Pakistan's Political Parties is a one-of-a-kind resource for diplomats, policymakers, journalists, and scholars searching for a comprehensive overview of Pakistan's party system and its unlikely survival against an interventionist military, with insights that extend far beyond the region.

**The Sporting Club** Thomas McGuane 1974-01-01

**Crossed Swords** Shuja Nawaz 2008 Based on 30 years of research and analysis, this definitive book is a profound, multi-layered, and historical analysis of the nature and role of the Pakistan army in the country's polity as well as its turbulent relationship with the United States. Shuja Nawaz examines the army and Pakistan in both peace and war. Using many hitherto unpublished materials from the archives of the United States, the United Kingdom, and the General Headquarters of the Pakistan Army, as well as interviews with key military and political figures in Pakistan and the United States, he sheds light not only on the Pakistan Army and its US connections but also on Pakistan as a key Muslim country in one of the world's toughest neighborhoods. In doing so, he lays bare key facts about Pakistan's numerous wars with India and its many rounds of political musical chairs, as well as the Kargil conflict of 1999. He then draws lessons from this history that may help Pakistan end its wars within and create a stabler political entity.

**Moral Panics and the Copyright Wars** William Patry 2009-09-03 In Moral Panics and the Copyright Wars, William Patry offers a lively, unflinching examination of the pitched battles over new technology, business models, and most of all, consumers. He lays bare how we got to where we are: a bloated, punitive legal regime that has strayed far from its modest, but important roots. A centrist and believer in appropriately balanced copyright laws, Patry concludes that the only laws we need are effective laws, laws that further the purpose of encouraging the creation of new works and learning.

**Transoceanic Dialogues** Véronique Bragard 2008 This work offers a close reading of literary works in French and in English by women writers whose ancestors originally came to the Caribbean or across the Indian Ocean as indentured labourers.

**The Shadow of Imana** Véronique Tadjo 2015-03-04 As evidence emerged of the genocide in Rwanda in 1994, the outside world reeled in shock. What could have motivated these individual and collective acts of evil? In 1998, Véronique Tadjo traveled to Rwanda to try to find out. She started with the premise that what happened in Rwanda concerns us all: "We need to understand. Our humanity is in peril." The Shadow of Imana is a reminder that humankind the

world over is capable of genocide. Records of what the author saw—sites of massacres, corpses, weapons dumps—are combined with personal stories of traumatized returnees, bereaved survivors, rape victims, orphans, lawyers faced with the impossible task of doing justice, prisoners. But Tadjó's story goes beyond mere reportage of death and cruelty. Her poetically wrought account incorporates traditional tales, explores the spiritual legacy of the genocide, and uncovers a healing vitality as well as a commitment to forgiveness. Véronique Tadjo was born in Paris and grew up in Côte d'Ivoire. The Shadow of Imana has been translated from the French by Véronique Wakerley.

**Unconquerable Nation** Brian Michael Jenkins 2006 The author presents a clear-sighted and sobering analysis of where we are today in the struggle against terrorism. Jenkins, an internationally renowned authority on terrorism, distills the jihadists' operational code and outlines a pragmatic but principled approach to defeating the terrorist enterprise. We need to build upon our traditions of determination and self-reliance, he argues, and above all, preserve our commitment to American values.

**WMD Terrorism** Stephen M. Maurer 2009 This collection of essays is a current and comprehensive review of what scientists and scholars know about WMD terrorism and America's options for confronting it. Complete with mathematical methods for analyzing terrorist threats and allocating defense resources, this multidisciplinary perspective addresses all forms and defenses of WMD, and the role of domestic U.S. politics in shaping defense investments and policies. Also identified are multiple instances in which the conventional wisdom is incomplete or misleading.

**Economic Policy in an Interdependent World** Richard N. Cooper 1987 These eleven essays written over the past fifteen years continue and develop Richard Cooper's central theme of interdependence, reflecting his experience in government in the Council of Economic Advisers and as Undersecretary of State for Economic Affairs. They focus in particular on the opportunities and constraints for national economic policy in an environment where goods, services, capital, and even labor are increasingly mobile. The first four chapters are informal, discursive treatments of economic and foreign policies in the face of growing interdependence among nations. The remaining chapters cover such specialist topics as optimal regional integration, the integration of world capital markets, the impact of greater interdependence on the effectiveness of domestic economic policy, the comparison of monetary and fiscal policy under fixed and flexible exchange rates, currency evaluation in developing countries, and the appropriate size and composition of a developing country's external debt. A concluding chapter surveys the preceding essays in terms of coordinating macroeconomic policymaking in an interdependent world economy. Richard N. Cooper is Maurits C. Boas Professor of International Economy at Harvard University.

**French Global** Christie McDonald 2011 Recasting French literary history in terms of the cultures and peoples that interacted within and outside of France's national boundaries, this volume offers a new way of looking at the history of a national literature, along with a truly global and contemporary understanding of language, literature, and culture. The relationship between France's national territory and other regions of the world where French is spoken and written (most of them former colonies) has long been central to discussions of "Francophonie." Boldly expanding such discussions to the whole range of French literature, the essays in this volume explore spaces, mobilities, and multiplicities from the Middle Ages to today. They rethink literary history not in terms of national boundaries, as traditional literary histories have done, but in terms of a global paradigm that emphasizes border crossings and encounters with "others." Contributors offer new ways of reading canonical texts and considering other texts that are not part of the traditional canon. By emphasizing diverse conceptions of language, text, space, and nation, these essays establish a model approach that remains sensitive to the specificities of time and place and to the theoretical concerns informing the study of national literatures in the twenty-first century.

**The Edge of Disaster** Stephen Flynn 2007-02-20 Why do we remain unprepared for the next terrorist attack or natural disaster? Where are we most vulnerable? How have we allowed our government to be so negligent? Who will keep you and your family safe? Is America living on borrowed time? How can we become a more resilient nation? Americans are in denial when it comes to facing up to how vulnerable our nation is to disaster, be it terrorist attack or act of God. We have learned little from the cataclysms of September 11 and Hurricane Katrina. When it comes to catastrophe, America is living on borrowed time—and squandering it. In this new book, leading security expert Stephen Flynn issues a call to action, demanding that we wake up and prepare immediately for a safer future. The truth is acts of terror cannot always be prevented, and nature continues to show its fury in frighteningly unpredictable ways. Resiliency, argues Flynn, must now become our national motto. With chilling frankness and clarity, Flynn paints an all too real scenario of the threats we face within our own borders. A terrorist attack on a tanker carrying liquefied natural gas into Boston Harbor could kill thousands and leave millions more of New Englanders without power or heat. The destruction of a ship with a cargo of oil in Long Beach, California, could bring the West Coast economy to its knees and endanger the surrounding population. But even these all-too-plausible terrorist scenarios pale in comparison to the potential destruction wrought by a major earthquake or hurricane. Our growing exposure to man-made and natural perils is largely rooted in our own negligence, as we take for granted the infrastructure handed down to us by earlier generations. Once the envy of the world, this infrastructure is now crumbling. After decades of neglect, our public health system leaves us at the mercy of microbes that could kill millions in the next flu pandemic. Flash flooding could wipe out a fifty-year-old dam north of Phoenix, placing thousands of homes and lives at risk. The next San Francisco earthquake could destroy century-old levees, contaminating the freshwater supply that most of California relies on for survival. It doesn't have to be this way. The Edge of Disaster tells us what we can do about it, as individuals and as a society. We can—and, Flynn argues, we must—construct a more resilient nation. With the wounds of recent national tragedies still unhealed, the time to act is now. Flynn argues that by tackling head-on, eyes open the perils that lie before us, we can remain true to our most important and endearing national trait: our sense of optimism about the future and our conviction that we can change it for the better for ourselves—and our children.

**Fixing Fragile States: A New Paradigm for Development** Seth D. Kaplan 2008-06-30 Fragile states are a menace. Their lawless environments spread instability across borders, provide havens for terrorists, threaten access to natural resources, and consign millions of people to poverty. But Western attempts to reform these benighted places have rarely made things better. Kaplan argues that to avoid revisiting the carnage and catastrophes seen in places like Iraq, Bosnia, and the Congo, the West needs to rethink its ideas on fragile states and start helping their peoples build governments and states that actually fit the local landscape. Fixing Fragile States lays bare the fatal flaws in current policies and explains why the only way to give these places a chance at peace and prosperity is to rethink how development really works. Flawed governance systems, not corrupt bureaucrats or armed militias, are the cancers that devour weak states. The cure, therefore, is not to send more aid or more peacekeepers but to redesign political, economic, and legal structures—to refashion them so they can leverage local traditions, overcome political fragmentation, expand governance capacities, and catalyze corporate investment. After dissecting the reasons why some states prosper and others sink into poverty

and violence, Fixing Fragile States visits seven deeply dysfunctional places—including Pakistan, Bolivia, West Africa, and Syria—and explains how even the most desperate of them can be transformed.

**Making Sense of Pakistan** Farzana Shaikh 2018-11-08 Pakistan's transformation from supposed model of Muslim enlightenment to a state now threatened by an Islamist takeover has been remarkable. Many account for the change by pointing to Pakistan's controversial partnership with the United States since 9/11; others see it as a consequence of Pakistan's long history of authoritarian rule, which has marginalized liberal opinion and allowed the rise of a religious right. Farzana Shaikh argues the country's decline is rooted primarily in uncertainty about the meaning of Pakistan and the significance of 'being Pakistani'. This has pre-empted a consensus on the role of Islam in the public sphere and encouraged the spread of political Islam. It has also widened the gap between personal piety and public morality, corrupting the country's economic foundations and tearing apart its social fabric. More ominously still, it has given rise to a new and dangerous symbiosis between the country's powerful armed forces and Muslim extremists. Shaikh demonstrates how the ideology that constrained Indo-Muslim politics in the years leading to Partition in 1947 has left its mark, skillfully deploying insights from history to better understand Pakistan's troubled present.

**Transnational French Studies** Alec G. Hargreaves 2012-01-01 The 2007 manifesto in favour of a "Litterature-monde en francais" has generated new debates in both "francophone" and "postcolonial" studies. Praised by some for breaking down the hierarchical division between "French" and "Francophone" literatures, the manifesto has been criticized by others for recreating that division through an exoticizing vision that continues to privilege the publishing industry of the former colonial metropole. Does the manifesto signal the advent of a new critical paradigm destined to render obsolescent those of "francophone" and/or "postcolonial" studies? Or is it simply a passing fad, a glitzy but ephemeral publicity stunt generated and promoted by writers and publishing executives vis-a-vis whom scholars and critics should maintain a skeptical distance? Does it offer an all-embracing transnational vista leading beyond the confines of postcolonialism or reintroduce an incipient form of neocolonialism even while proclaiming the end of the centre/periphery divide? In addressing these questions, leading scholars of "French", "Francophone" and "postcolonial" studies from around the globe help to assess the wider question of the evolving status of French Studies as a transnational field of study amid the challenges of globalization.

**The End of Alliances** Professor of Political Science Rajan Menon 2007-04-05 In *The End of Alliances*, Menon offers a bold new vision of the future of American—and global—foreign affairs, one that does not include familiar, contractual agreements amongst states. Yet, contrary to prevailing wisdom, Menon argues, a world without US-led alliances will not be marked by American isolationism, a divorce between Europe and America, or total global upheaval. Instead, in place of rigid military pacts, countries will enter into contingent alignments and specific coalitions created for particular ends.

**Francophone Postcolonial Studies** Charles Forsdick 2003 This landmark text constitutes the first comprehensive overview of Francophone Postcolonial Studies. Moving away from reductive geographical or linguistic surveys of the Francophone world, this collection of original essays provides a thematic discussion of the complex historical, political and cultural links between France and its former colonies. Providing a theoretical framework for postcolonial criticism of the field, it also aims to trigger a genuine dialogue between Francophone and Anglophone scholars of postcolonialism. Part I provides a historical overview, from the eighteenth to the twentieth century, addressing issues of colonialism, slavery and exoticism. Part II looks at language issues and discusses France's belief in the universality of its language and culture and the postcolonial challenges to that view. Part III discusses issues of diversity and multiculturalism in contemporary Francophone cultures. Part IV concludes with an analysis of the French-language contribution to postcolonialism as well as an examination of Francophone postcolonial thought and culture in the principal areas of the French-speaking world. Edited by two of the up-and-coming names in Francophone Postcolonial Studies, the collection includes contributions from an international team including some of the world's leading scholars in the field.

**Toussaint Louverture** Charles Forsdick 2016-10-20 'In overthrowing me, you have done no more than cut down the trunk of the tree of liberty - it will spring back from the roots, for they are numerous and deep.' - Toussaint Louverture The leader of the only successful slave revolt in history, Toussaint Louverture is seen by many to be one of the greatest anti-imperialist fighters who ever lived. Born into slavery on a Caribbean plantation, he was able to break from his bondage to lead an army of freed African slaves to victory against the professional armies of France, Spain and Britain in the Haitian Revolution of 1791-1804. In this biography, Louverture's fascinating life is explored through the prism of his radical politics. It champions this 'black Robespierre' whose revolutionary legacy had inspired people and movements in the two centuries since his death. For anyone interested in the roots of modern-day resistance movements and black political radicalism, Louverture's extraordinary life provides the perfect starting point.

**Hard Call** John McCain 2007-08-14 America's most inspiring politician pays tribute to men and woman who have exhibited composure, wisdom and intellect in the face of tough decisions. John McCain draws from experiences of both extraordinary people and people in extraordinary circumstances, culling lessons about the process and nature of judicious and effective decision-making. Acclaimed authors John McCain and Mark Salter describe the anatomy of great decisions in history by telling the remarkable stories of men and women who have exemplified composure, wisdom, and intellect in the face of life's toughest decisions. They identify six qualities typically represented in the best decisions: Awareness. Timing. Foresight. Confidence. Humility. Inspiration. These qualities are personified by the exceptional individuals in this book, each of whom made a hard call, including: Henry Ford's decision to sacrifice his company's competitive edge by reducing the work day and guaranteeing a minimum wage; Branch Rickey's decision to offer Jackie Robinson a contract to play for the Brooklyn Dodgers in the face of public opposition; Ellen Johnson-Sirleaf's decision to return to wartorn Liberia after receiving an economics degree from Harvard; General Fred Weyand's decision to redeploy fifteen of his battalions despite resistance from senior American military commanders in Vietnam. Woven into these stories are John McCain's own views on the process and art of decision-making and examples of the hard calls we face in our lives. "When I assess a decision," McCain writes, "I want to know all I can about the character of the decision maker before I examine the properties of the decision, its outcome or how it was arrived at." *Hard Call* is a testament to the people whose choices serve as a beacon for us all.

**Reconciliation** Benazir Bhutto 2009-10-13 "It is impossible to understand today's world without knowing Pakistan; and impossible to understand Pakistan without reading this book. A courageous woman—tragically killed—speaks to us of reconciliation. We owe it to her—and to ourselves—to listen, comprehend, and act." — Madeleine Albright "One of the most gripping and important books of our era." — Walter Isaacson Benazir Bhutto returned to Pakistan in October 2007, after eight years of exile, hopeful that she could be a catalyst for change. Upon a tumultuous reception, she survived a suicide-bomb attack that killed nearly two hundred of her compatriots. But she continued to forge ahead, with more courage and conviction than ever, since she knew that time was running out—for the future of her nation and for her life. In *Reconciliation*, Bhutto recounts in gripping detail her final months in Pakistan and offers a bold new agenda for how to stem the tide of Islamic radicalism and to rediscover the values of tolerance and justice that lie at the heart of her religion. She speaks out not just to the West but also to the Muslims across the globe. Bhutto presents an image of modern Islam that defies the negative caricatures often seen in the West. After reading this book, it will become even clearer

what the world has lost by her assassination

**Countering Al Qaeda** Brian Michael Jenkins 2002 This monograph reviews events since the terrorist attacks of September 11, 2001, and discusses the current state of al Qaeda and the kinds of actions that can be expected of it in the future. Al Qaeda constitutes the most serious immediate threat to the security of the United States, so the campaign against terrorism must remain focused. The monograph describes the central elements that must be emphasized in the next, more-complex phase of that campaign.

**Pakistan's Drift into Extremism: Allah, the Army, and America's War on Terror** Hassan Abbas 2015-03-26 This book examines the rise of religious extremism in Pakistan, particularly since 1947, and analyzes its connections to the Pakistani army's corporate interests and U.S.-Pakistan relations. It includes profiles of leading Pakistani militant groups with details of their origins, development, and capabilities. The author begins with an historical overview of the introduction of Islam to the Indian sub-continent in 712 AD, and brings the story up to the present by describing President Musharraf's handling of the war on terror. He provides a detailed account of the political developments in Pakistan since 1947 with a focus on the influence of religious and military forces. He also discusses regional politics, Pakistan's attempt to gain nuclear power status, and U.S.-Pakistan relations, and offers predictions for Pakistan's domestic and regional prospects.

**Representing Genocide** Rebecca Jinks 2016-06-02 This book explores the diverse ways in which Holocaust representations have influenced and structured how other genocides are understood and represented in the West. Rebecca Jinks focuses in particular on the canonical 20th century cases of genocide: Armenia, Cambodia, Bosnia, and Rwanda. Using literature, film, photography, and memorialisation, she demonstrates that we can only understand the Holocaust's status as a 'benchmark' for other genocides if we look at the deeper, structural resonances which subtly shape many representations of genocide. *Representing Genocide* pursues five thematic areas in turn: how genocides are recognised as such by western publics; the representation of the origins and perpetrators of genocide; how western witnesses represent genocide; representations of the aftermath of genocide; and western responses to genocide. Throughout, the book distinguishes between 'mainstream' and other, more nuanced and engaged, representations of genocide. It shows how these mainstream representations - the majority - largely replicate the representational framework of the Holocaust, including the way in which mainstream Holocaust representations resist recognising the rationality, instrumentality and normality of genocide, preferring instead to present it as an aberrant, exceptional event in human society. By contrast, the more engaged representations - often, but not always, originating from those who experienced genocide - tend to revolve around precisely genocide's ordinariness, and the structures and situations common to human society which contribute to and become involved in the violence.

**Asia, America, and the Transformation of Geopolitics** William H. Overholt 2007-11-05 American security and prosperity now depend on Asia. William H. Overholt offers an iconoclastic analysis of developments in each major Asian country, Asian international relations, and US foreign policy. Drawing on decades of political and business experience, he argues that obsolete Cold War attitudes tie the US increasingly to an otherwise isolated Japan and obscure the reality that a US-Chinese condominium now manages most Asian issues. Military priorities risk polarizing the region unnecessarily, weaken the economic relationships that engendered American preeminence, and ironically enhance Chinese influence. As a result, US influence in Asia is declining. Overholt disputes the argument that democracy promotion will lead to superior development and peace, and forecasts a new era in which Asian geopolitics could take a drastically different shape. Covering Japan, China, Russia, Central Asia, India, Pakistan, Korea, and South-East Asia, Overholt offers invaluable insights for scholars, policy-makers, business people, and general readers.

**Facial Magic - Rediscover the Youthful Face You Thought You Had Lost Forever!** Cynthia Rowland 2017-05-10 Once in a while a product line comes along that offers men and women the opportunity to truly reclaim the youthful face they thought they had lost forever. Without drugs, electricity or anything harmful or hurtful millions of people worldwide have successfully and reliably used exercise to trim, lift and tone sagging muscles. Just like muscles in the body can be exercised, the facial muscles can greatly benefit from exercise but not just any exercise will do. Contortions, twists, puckers and funny faces will not shape or contour sagging facial muscles in a mature face. The Facial Magic facial exercise system will lift, tone and tighten sagging facial muscles. These proven, easy-to-execute isometric movements require only minutes a day to perform and most users say they look 5, 10 even 15 years younger in just weeks as eyelids tighten, eye brows lift, the forehead smoothes, jowls and pouches melt away as double chins lessen, dramatically revealing a sculpted jaw line. Facial Magic provides the look of a face lift without surgery, seams or risk of infection. Using only the thumbs and fingers while wearing special exercise gloves, your "age erasers" will produce immediate lifting and tightening of the facial features. In about three weeks the appearance of fine lines and wrinkles become less apparent as the muscles plump up the skin helping the user's face look refreshed, radiant and younger. This book contains all 18 Facial Magic exercises. Learn two exercises each week - each exercise requires 35 seconds - so in just minutes a day you will feel and see the youthful results you desire.
