Supporting the authors' instruction are readings by professional and student writers and over 150 visuals. *Good Reasons with Contemporary Arguments* is distinctive for its discussion of why people write arguments, its coverage of rhetorical analysis and visual analysis in a brief format, its close attention to reading arguments, its thorough attention to research, and its emphasis on provocative topics in the reader section of the book. 0321951573 / 9780321951571 *Good Reasons with Contemporary Arguments Plus* NEW MyWritingLab with Pearson eText -- Access Card Package Package consists

A quarter of a century has passed since the crumbling of the Berlin Wall. Yet our notions of security remain mired in Cold War thinking whose realist ethos is predicated on holding the nation state's power, interests, and survival as the guiding unit of analysis in international relations. Security is ever changing. Confronting new dangers to the individual, the state, and the international order calls for new categories that speak to the new influence of globalization, international institutions, and transnational threats. Composed of original essays by a cosmopolitan mix of leading figures inside and outside the academy, this book proves relevant to any number of classes and courses, and its controversial character makes it all the more necessary and appealing. **The Runner in Red** Tom Murphy 2017-12-11 Set against the backdrop of the 2000 Boston Marathon, the millennial

marathon, this fictional novel attempts to solve the mystery of the "Runner in Red."

Contested Ecologies Lesley Green 2013 "Contests over knowledge are central to contests over environments. Many of those contests are not just about 'good science' or 'bad science', but over the idea of nature itself: the idea that the nature that science makes known to the world is set apart from 'culture' or 'society', or that nature is comprised of objects -- rivers, fish, soil -- the knowledge of which lies outside social life and democratic politics. *Contested Ecologies: Dialogues in the South on Nature and Knowledge* focuses on moments in which contests over ecology become moments for rethinking this ecology of knowledge. The chapters cover a wide variety of settings -- from urban Cape Town to indigenous activism in Peru; from Mugabe's Zimbabwe to the Benguela ecosystem fisheries, and include protected area in the Aboriginal territories of northern Australia."--Back cover.

Building a Masterpiece Anne Watson 2013 Building a masterpiece explores some of the untold chapters in the long history of the Opera House's gestation, development and completion -- of individuals whose careers were made or broken by the Opera House, the companies whose reputations were secured through their association with the building, and the pioneering construction methods, innovative technologies and methodologies developed to meet the demands of its unprecedented design and challenging construction. The workers who built the building, the politicians, architects and members of the public who championed it and its often beleaguered architect are discussed as is its current world status as a symbol of Australia. To coincide with the 40th anniversary of the opening of the Sydney Opera House, this new edition of *Building a Masterpiece* will include a new chapter on another little known and much misunderstood story: the architect who took over from

Utzon and completed the project.

Rain of the Ghosts Greg Weisman 2013-12-03 Rain of the Ghosts is the first in Greg Weisman's series about an adventurous young girl, Rain Cacique, who discovers she has a mystery to solve, a mission to complete and, oh, yes, the ability to see ghosts. Welcome to the Prospero Keys (or as the locals call them: the Ghost Keys), a beautiful chain of tropical islands on the edge of the Bermuda Triangle. Rain Cacique is water-skiing with her two best friends Charlie and Miranda when Rain sees her father waiting for her at the dock. Sebastian Bohique, her maternal grandfather, has passed away. He was the only person who ever made Rain feel special. The only

one who believed she could do something important with her life. The only thing she has left to remember him by is the armband he used to wear: two gold snakes intertwined, clasping each other's tails in their mouths. Only the armband . . . and the gift it brings: Rain can see dead people. Starting with the Dark Man: a ghost determined to reveal the Ghost Keys' hidden world of mystery and mysticism, intrigue and adventure.

Imagining the Future City Sarah Bell 2013-11-18 London is one of the world's leading cities. It is home to an extraordinary concentration and diversity of people, industries, politics, religions and ideas, and plays an important role in our highly globalised and tightly networked modern world. What does the future hold for London? Investigating any aspect of the city's future reveals a complex picture of interrelations and dependencies. The London 2062 Programme from University College London brings a new, cross-disciplinary and highly collaborative approach to investigating this complexity. The programme crosses departmental boundaries within the university, and promotes active collaboration between leading academics and those who shape London through policy and practice. This book approaches the question of London's future by considering the city in terms of Connections, Things, Power and Dreams.

Why They Died 2007 The conflict between Israel and Hezbollah in July 2006 had a devastating effect on civilians in Lebanon. Israeli attacks killed at least at 1,109 Lebanese, the vast majority of them civilians. The strikes also injured 4, 399 people and displaced an estimated one million. This report presents the most extensive investigation to date that anyone has conducted into the circumstances surrounding these civilian deaths. Human Rights Watch visited more than 50 Lebanese villages, interviewed over 355 witnesses, and investigated 94 separate incidents of Israeli attacks. These attacks claimed the lives of 510 civilians, as well as 51 Hezbollah combatants--almost half of the Lebanese death in the conflict.

After the End James M. Scott 1998-12-31 In the political

landscape emerging from the end of the Cold War, making U.S. foreign policy has become more difficult, due in part to less clarity and consensus about threats and interests. In *After the End* James M. Scott brings together a group of scholars to explore the changing international situation since 1991 and to examine the characteristics and patterns of policy making that are emerging in response to a post-Cold War world. These essays examine the recent efforts of U.S. policymakers to recast the roles, interests, and purposes of the United States both at home and abroad in a political environment where policy making has become increasingly decentralized and democratized. The contributors suggest that foreign policy leadership has shifted from White House and executive branch dominance to an expanded group of actors that includes the president, Congress, the foreign policy bureaucracy, interest groups, the media, and the public. The volume includes case studies that focus on China, Russia, Bosnia, Somalia, democracy promotion, foreign aid, and NAFTA. Together, these chapters describe how policy making after 1991 compares to that of other periods and suggest how foreign policy will develop in the future. This collection provides a broad, balanced evaluation of U.S. foreign policy making in the post-Cold War setting for scholars, teachers, and students of U.S. foreign policy, political science, history, and international studies. Joan Crawford David Bret 2009-04-15 In the first biography of Joan Crawford to give the full, uncensored story, bestselling author David Bret tells Crawford's rags to riches climb, from working in a Kansas City laundry to collecting an Oscar for her defining role in *Mildred Pierce*, and on to her devotion to Christian Science and reliance on vodka. He discusses the star's legendary relationship with Clark Gable, her countless love affairs, her marriages -- three of them to gay men -- and her obsession with rough sex. Bret divulges what really happened that led her to disinherit two of her four children, earning her the nickname "Mommie Dearest," as well as how her loathed mother forced Crawford to work as a prostitute, appear in pornographic films, and sleep her way to the top. Bret analyzes Crawford's films, many of which were constructed purely as vehicles where actress and character were often indistinguishable. Overtly generous towards her coterie of gay friends, she was heartless towards her enemies, particularly Bette Davis, her co-star in *Whatever Happened to Baby Jane*, with whom she shared a lifelong feud. Drawing on a wealth of unpublished material and interviews, David Bret presents a unique, fascinating portrait of a single-minded, uncompromising woman.

A Time to Lead Wesley K. Clark 2007-09-04 Four-star General Wesley K. Clark became a major figure on the political scene when he was drafted by popular demand to run for the Democratic nomination for President of the United States in 2003. But this was just one of many exceptional accomplishments of a long and extraordinary career. Here, for the first time, General Clark uses his unique life experience—from his difficult youth in segregated Arkansas where he was raised by his poor, widowed mother; through the horror of Vietnam where he was wounded; the post-war rebuilding of national security and the struggles surrounding the new world

order after the Cold War—as a springboard to reveal his vision for America, at home and in the world. General Clark will address issues such as foreign policy, the economy, the environment, education and health care, family, faith, and the American dream. Rich with breathtaking battle scenes, poignant personal anecdote and eye-opening recommendations on the best way forward, General Clark's new book is a tour de force of gripping storytelling and inspiring vision.

In Search of Democracy Larry Diamond 2015-07-16 This book evaluates the global status and prospects of democracy, with an emphasis on the quality of democratic institutions and the effectiveness of governance as key conditions for stable democracy. Bringing together a wide range of the author's work over the past three decades, it advances a framework for assessing the quality of democracy and it analyzes alternative measures of democracy. Drawing on the most recent data from Freedom House, it assesses the global state of democracy and freedom, as of the beginning of 2015, and it explains why the world has been experiencing a mild but now deepening recession of democracy and freedom since 2005. A major theme of the book across the three decades of the author's work is the relationship between democratic quality and stability. Democracies break down, Diamond argues, not so much because of economic factors but because of corrupt, inept governance that violates individual rights and the rule of law. The best way to secure democracy is to ensure that democracy is accountable, transparent, genuinely competitive,

respectful of individual rights, inclusive of diverse forms and sources of participation, and responsive to the needs and aspirations of ordinary citizens. Viable democracy requires not only a state that can mobilize power to achieve collective goals, but also one that can restrain and punish the abuse of power—a particularly steep challenge for poor countries and those with natural resource wealth. The book examines these themes both in broad comparative perspective and with a deeper analysis of historical trends and future prospects in Africa and Asia. Concluding with lessons for sustaining and reforming policies to promote democracy internationally, this book is essential reading for students and scholars interested in democracy, as well as politics and international relations more generally.

Rethinking the Law of Armed Conflict in an Age of Terrorism Christopher A. Ford 2012 Ten years after the terrorist attacks of September 11, 2011, *Rethinking the Law of Armed Conflict in an Age of Terrorism*, edited by Christopher Ford and Amichai Cohen, brings together a range of interdisciplinary experts to examine the problematic encounter between international law and challenges presented by conflicts between developed states and non-state actors, such as international terrorist groups. Through examinations of the counter-terrorist experiences of the United States, Israel, and Colombia coupled with legal and historical analyses of trends in international humanitarian law the authors place post-9/11 practice in the context of the international legal community's broader struggle over the substantive content of international rules constraining state behavior in irregular wars and explore trends in the development of these rules. From the beginning of international efforts to rewrite the laws of armed conflict in the 1970s, the legal rules to govern irregular conflicts of the state-on-nonstate variety have been contested terrain. Particularly in the wake of the 9/11 attacks, policymakers, lawyers, and scholars have debated the merits, relevance, and applicability of what are said to be competing war and

law enforcement paradigms of legal constraint and even the degree to which international law can be said to apply to counter-terrorist conflicts at all. Ford & Cohen's volume puts such debates in historical and analytical context, and offers readers an insight into where the law has been headed in the fraught years since September 2001. The contributors provide the reader with differing perspectives upon these questions, but together their analyses make clear that law-governed restraint remains a cardinal value in counter-terrorist war, even as the law stands revealed as being much more contested and indeterminate than many accounts would have it. *Rethinking the Law of Armed Conflict in an Age of Terrorism* provides an important conceptual framework through which to view the development of the law as the policy and legal communities move into the second decade of the global war on terrorism. Amelia Earhart Marie K. Long 2000-01-15 When Amelia Earhart disappeared on July 2, 1937, she was flying the longest leg of her around-the-world flight and was only days away from completing her journey. Her plane was never found, and for more than sixty years rumors have persisted about what happened to her. Now, with the recent discovery of long-lost radio messages from Earhart's final flight, we can say with confidence that she ran out of gas just short of her destination of Howland Island in the Pacific Ocean. From the beginning of her flight, a series of tragic circumstances all but doomed her and her navigator, Fred Noonan. Authors Elgen M. and Marie K. Long spent more than twenty-five years researching the mystery surrounding Earhart's final flight before finally determining what happened. They traveled over one hundred thousand miles to interview more than one hundred people who knew some part of the Earhart story. They draw on authoritative sources to take us inside the cockpit of the Electra plane that Earhart flew and recreate the final flight itself. Because Elgen Long began his own flying career not long after Earhart's disappearance, he can describe the equipment and conditions of the time with a vivid first-

hand accuracy. As a result, this book brings to life the primitive conditions under which Earhart flew, in an era before radar, with unreliable communications, grass landing strips, and poorly mapped islands. *Amelia Earhart: The Mystery Solved* does more than just answer the question, What happened to Amelia Earhart? It reminds us how daring early aviators such as Earhart were as they risked their lives to push the technology of the day to its limits -- and beyond.

Poverty and Social Impact Analysis of Reforms Aline Coudouel 2006-01-01 "Poverty and Social Impact Analysis (PSIA) is an approach used increasingly by governments, civil society organizations, the World Bank, and other

development partners to examine the distributional impacts of policy reforms on the well-being of different stakeholder groups, particularly the poor and vulnerable. PSIA has an important role in the elaboration and implementation of poverty reduction strategies in developing countries because it promotes evidence-based policy choices and fosters debate on policy reform options. Poverty and Social Impact Analysis of Reforms presents a collection of case studies that illustrate the spectrum of sectors and policy reforms to which PSIA can be applied; it also elaborates on the broad range of analytical tools and techniques that can be used for PSIA. The case studies provide examples of the impact that PSIA can have on the design of policy reforms and draw operational lessons for PSIA implementation. The case studies deal largely with policy reforms in a single sector, such as agriculture (crop marketing boards in Malawi and Tanzania and cotton privatization in Tajikistan); energy (mining sector in Romania and oil subsidies in Ghana); utilities (power sector reform in Ghana, Rwanda, and transition economies, and water sector reform in Albania); social sectors (education reform in Mozambique and social welfare reform in Sri Lanka); taxation reform (Nicaragua); as well as macroeconomic modeling (Burkina Faso)."

Homeland and Philosophy Robert Arp 2014-10-20 In *Homeland and Philosophy*, 23 philosophers tackle the issues that Showtime's award winning show, *Homeland*, asks us to consider. The show, which centers on Marine Sergeant Nicholas Brody's release from an al-Qaeda prison, and CIA Agent Carrie Mathison's distrust of his intentions, asks questions of identity, what it means to be a terrorist, the conditions and effects of brainwashing, lying for the greater good, and whether or not courage is a virtue. But these questions are only a few among many that are explored in the shadowy spy-filled world of *Homeland*. Through the lenses of Rawls, Kant, Arendt, Foucault, Heidegger, Sartre, and Kierkegaard, among others, *Homeland and Philosophy*

considers the ethics of drone warfare; whether or not Carrie Mathison's personality changes and psychological disorder make her an interesting character study in the metaphysics of personhood; at what point is privacy only an illusion; and concepts of torture, punishment, and discipline. Nicholas Brody is a Marine, a terrorist, a double agent, a congressman, a father, a husband, a lover, and a friend...but who is Nicholas Brody?

The Political Economy of Energy Subsidy Reform Gabriela Inchauste 2017-03-22 This book proposes a simple framework for understanding the political economy of subsidy reform and applies it to four in-depth country studies covering more than 30 distinct episodes of reform. Five key lessons emerge. First, energy subsidies often follow a life cycle, beginning as a way to stabilize prices and reduce exposure to price volatility for low-income consumers. However, as they grow in size and political power, they become entrenched. Second, subsidy reform strategies vary because the underlying political economy problems vary. When benefits are concentrated, satisfying (or isolating) interest groups with alternative policies is an important condition for effective reform. When benefits are diffuse, it can be much harder to identify and manage the political coalition needed for reform. Third, governments vary in their administrative and political capacities to implement difficult energy subsidy reforms. Fourth, improvements in social protection systems are often critical to the success of reforms because they make it possible to target assistance to those most in need. Finally, the most interesting cases involve governments that take a strategic approach to the challenges of political economy. In these settings, fixing energy subsidies is central to the governments' missions of retaining political power and reorganizing how the government delivers benefits to the population. These cases are examples of "reform engineering," where governments actively seek to create the capacity to implement alternative policies, depoliticize tariffs, and build credibility around alternative policies. The

most successful reforms involve active efforts by policy leaders to identify the political forces supporting energy subsidies and redirect or inoculate them.
