Contemporary Criminology and Criminal Justice Theory G. Skoll 2009-08-31 This book casts a critical eye on scholarship in the field of criminal justice, and offers some new orientations to help develop explanations for twenty-first century criminology and criminal justice studies.

ICESat H. Jay Zwally 2002

Loblolly House Stephen Kieran 2008-06-19 Situated on idyllic Taylors Island, off the coast of Maryland's Chesapeake Bay, Loblolly House inaugurates a new, more efficient way of building. Through the use of state-of-the-art building information modeling, the architects were able to streamline the design-build process. This is a manual for the componentized prefab.

The Great Transformation. Foreword by Robert M. MacIver Karl Polanyi 1964

Social Theory Charles Lemert 2018-05-15 For nearly a quarter-century, Charles Lemert has shared his love of social theory, and the questions it explores, in this collection of readings. With 140 selections that begin in the nineteenth century and end in 2015, Social Theory charts the long arc of the development of the field. This edition retains classic texts by Karl Marx, Emile Durkheim, Max Weber, and W.E.B. Du Bois and writings of major contemporary figures like Audre Lorde and Patricia Hill Collins, while adding pieces from Harriet Martineau, Friedrich Nietzsche, Kimberly Williams Crenshaw, Thomas Piketty, and Ta-Nehisi Coates, among others. Revised and updated with a new section exploring social theory at the limits of the social, Lemert's Social Theory remains essential reading.

Refract House Ila Leslie Berman 2011 "Refract House, a joint endeavor of the Division of Architecture at California College of the Arts and the School of Engineering at Santa Clara University, is a full-scale working prototype of a prefabricated solar-powered home, with a sophisticated sensor-informed energy production and distribution system and an innovative thermal building skin" -- Introduction.

Risk and Blame Professor Mary Douglas 2013-06-17 First published in 1992, this volume follows on from the programme for studying risk and blame that was implied in Purity and Danger. The first half of the book Douglas argues that the study of risk needs a systematic framework of political and cultural comparison. In the latter half she examines questions in cultural theory. Through the eleven essays contained in Risk and Blame, Douglas argues that the prominence of risk discourse will force upon the social sciences a programme of rethinking and consolidation that will include anthropological approaches.

The SAGE Handbook of Evaluation Ian Shaw 2006-07-27 In this comprehensive handbook, an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people-related programs, policies, and practices. The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single, accessible volume. With contributions from world-leading figures in their fields overseen by an eminent international editorial board, this handbook is an extensive and user-friendly resource.

The Blue Peace Sundeep Waslekar 2011

Beyond Civilization Daniel Quinn 2009-02-04 In Beyond Civilization, Daniel Quinn thinks the unthinkable. We all know there's no one right way to build a bicycle, no one right way to design an automobile, no one right way to make a pair of shoes, but we're convinced that there must be only one right way to live -- and the one we have is it, no matter what. Beyond Civilization makes practical sense of the vision of Daniel Quinn's best-selling novel Ishmael. Examining ancient civilizations such as the Maya and the Olmec, as well as modern-day microcosms of alternative living like circus societies, Quinn guides us on a quest for a new model for society, one that is forward-thinking and encourages diversity instead of suppressing it. Beyond Civilization is not about a "New World Order" but a "New Personal World Order" that would allow people to assert control over their own destiny and grant them the freedom to create their own way of life right now - - not in some distant utopian future.

Swatt Architects Swatt Architects 2004 Swatt Architects is an award-winning San Francisco Bay Area firm known for fusing a modernist sensibility with the challenges of California landscapes, creating unique spaces for living. Over the past 10 years, a special focus of Swatt Architects has been in the areas of single and multi-family residential design. With new houses throughout California, the firm has gained international recognition for creating distinctive, livable modern architecture that emphasizes the creative use of structure and materials, elegant detailing, spatial continuity and transparency that dissolves the boundary between indoors and outdoors. This monograph presents the recent work of Swatt Architects along with earlier creative explorations, and concludes with drawings and models of exciting new designs for future projects.

Sociology Howard J. Sherman 1982

Water in the Middle East Hussein A. Amery 2010-06-04 Finding "streams in the desert" has never been more urgent for the peoples of the Middle East. Rapid population growth and a rising standard of living are driving water demand inexorably upward, while the natural supply has not increased since Biblical times. Ensuring a fair and adequate distribution of water in the region is vitally important for building a lasting peace among the nations of the Middle East. Addressing water needs from a geographical perspective, the contributors to this book analyze and assess the impact of scarce water resources in the Jordan River basin countries and territories (Israel, Jordan, Lebanon, Palestine, and Syria) as these long-time antagonists work toward peace. After geographical and historical overviews, the authors envision the future-what the water issues may be when Israel and Syria begin negotiating, the "hydro-security" needs of each nation, and the difficulties of planning for uncertainty. Without proposing any one ideal scheme, they discuss the possibilities for cooperative sharing of water resources, while honestly acknowledging the political constraints that may limit such projects. The final essay speaks to the needs of the one party so rarely represented at the negotiating table—the Jordan River itself.

Walk the Walk and Talk the Talk Geoffrey R. Skoll 1992 As a counselor for more than two years at a

residential drug abuse treatment facility located in a midwestern city, Geoffrey Skoll observed the many contradictions between the public image of the institution as a center for therapy and treatment and the actual day-to-day practices that go on inside. In this case study, he argues that the facility forces its residents to "walk the walk and talk the talk" by compelling them to subscribe to its rules and ideology, which emphasize the need for them to conform to the image of a dope fiend in order to show "progress" in treatment. Skoll contends that facilities like this do not produce a positive change in the character of their residents as claimed, but instead reinforce negative social identities, especially the residents' powerlessness and subordinate status. Providing treatment mainly for cocaine and heroin abuse, the institution recruits most of its clientele from the criminal justice system and controls them with the threat of returning them to jail. Skoll demonstrates that behind the facility's ethic of caring and openness lurks a fear on the part of the staff that this is a deviant population that must be controlled and that their deviance (their pleasure in taking drugs, for example) may be contagious. He cites specific interactions that force residents to "snitch" on each other over petty misdemeanors in order to perpetuate negative identities such as whore or drug addict. This betrayal by peers further justifies the coercion of residents who resist reform. The drop-out rate from this facility is so high that the "revolving door" has become part of the center's basic structure. Skoll observes that those who remain in the program tolerate its ideology because it is the only one they know. Any attempts to formulate alternative ideologies are simply repressed. Skoll's analysis reveals that this treatment facility aims at thought reform and behavioral control rather than therapy, and he concludes that this approach confirms the addict lifestyle for most of its patients.

The Real Global Warming Disaster Christopher Booker 2013-01-31 This original book considers one of the most extraordinary scientific and political stories of our time: how in the 1980s a handful of scientists came to believe that mankind faced catastrophe from runaway global warming, and how today this has persuaded politicians to land us with what promises to be the biggest bill in history. Christopher Booker interweaves the science of global warming with that of its growing political consequences, showing how just when the politicians are threatening to change our Western way of life beyond recognition, the scientific evidence behind the global warming theory is being challenged like never before. The book exposes the myth that the global warming theory is supported by a 'consensus of the world's top climate scientists'. It shows how the UN's Intergovernmental Panel on Climate Change is run by a small group of 'global warming' zealots, who have repeatedly rigged evidence to support their theory. But the politicians, pushed by the media, have so fallen for its propaganda that, short of dramatic change, our Western world now faces an unprecedented disaster.

Summaries of Thought Christian Nestell Bovee 1871

Strangely Like War Derrick Jensen 2003 Ever since Gilgamesh cut down the ancient cedar forests of Mesopotamia, civilizations and empires have foundered and collapsed in the wake of widespread deforestation. Today, with three-quarters of the world's original forests gone and the pace of cutting, clearing, processing, and pulping ever accelerating, Jensen and Draffan lay bare the stark scenario we face unless deforestation is slowed and stopped—a scenario which will affect not only people, but the non-human fabric of life itself. Strangely like War is a story of corruption and killing: the genocide of indigenous peoples and the systematic destruction of our ecosystem. It is essential reading for anyone wanting to understand the relationship between deforestation and the current ecological crisis we face, and a valuable source of information for forest and anti-globalisation activists.

The Jihad Next Door Dina Temple-Raston 2007-12-07 They called themselves the Arabian Knights. They were six Yemeni-American friends, a gang of high-school soccer stars, a band of brothers on the grim side streets of Lackawanna's First Ward, just a stone's throw from Buffalo. Later, people would argue about why they left western New York in the spring of 2001 to attend an al-Qaeda camp. Some said they traveled to Afghanistan to become America's first sleeper cell—terrorists slumbering while they awaited orders from on high. Others said that their ill-fated trip was a lark, an adventurous extension of their youthful wrestling with what it meant to be Muslim in America. Dina Temple-Raston returns to Lackawanna to tell the story of a group of young men—born and brought up in small town America—who left otherwise unremarkable lives to attend an al-Qaeda camp. Though they sought to quietly slip back into their roles as middle class Americans, the 9/11 attacks made that impossible. The Jihad Next Door is the story of pre-emptive justice in the age of terror. It follows a handful of ordinary men through an extraordinary time when Muslims in America are often instantly suspect, their actions often viewed through the most sinister lens.

Cows, Pigs, Wars, and Witches Marvin Harris 2011-07-13 One of America's leading anthropologists offers solutions to the perplexing question of why people behave the way they do. Why do Hindus worship cows? Why do Jews and Moslems refuse to eat pork? Why did so many people in post-medieval Europe believe in witches? Marvin Harris answers these and other perplexing questions about human behavior, showing that no matter how bizarre a people's behavior may seem, it always stems from identifiable and intelligible sources.

What We Leave Behind Derrick Jensen 2011-01-04 What We Leave Behind is a piercing, impassioned guide to living a truly responsible life on earth. Human waste, once considered a gift to the soil, has become toxic material that has broken the essential cycle of decay and regeneration. Here, award-winning author Derrick Jensen and activist Aric McBay weave historical analysis and devastatingly beautiful prose to remind us that life—human and nonhuman—will not go on unless we do everything we can to facilitate the most basic process on earth, the root of sustainability: one being's waste must always become another being's food. **Constructing The Self, Constructing America** Philip Cushman 1995-03-20 In this groundbreaking "cultural history of psychotherapy", historian and psychologist Philip Cushman shows how the development of modern psychotherapy is inextricably intertwined with that of the United States and how it has fundamentally changed the way Americans view events and themselves. Using an interpretive historical approach, Cushman shows how and why psychotherapy was created, what its functions are, and how it has come to play such an enormous role in American life. Asserting that each era develops a different conception of "what it means to be human", Cushman traces the evolution of the self throughout history to contemporary times, naming its current configuration in our consumerist society the "empty self", one that needs constant filling. In Constructing the Self, Constructing America, he places psychotherapy in its social and historical context, and examines its origins in the nineteenth century to its preeminence in American life today, arguing that its establishment as a social institution may in fact reproduce some of the very ills that it is meant to heal. Finally, in an unusual move, Cushman suggests a way to use interpretive methods in the everyday practice of psychotherapy. By doing so, he hopes to dissuade both patient and therapist from colluding with the empty self or the rampant consumerism of our time.
