The Unconscious Civilization John Ralston Saul 1995-11-01 Governor General's Award Winner Tenth Anniverary Edition, with a new preface Our society, John Ralston Saul argues in his 1995 CBC Massey Lectures, is only superficially based on the individual and democracy. Increasingly it is conformist and corporatist, a society in which legitimacy lies with specialist or interest groups and decisions are made through constant negotiations between these groups. The paradox of our situation is that knowledge has not made us conscious. Instead, we have sought refuge in a world of illusion where language is cut off from reality. Reconnecting language to reality, clarifying what we mean by individualism and democracy, making these realities central to the citizen's life, identifying ideologies in order to control them, these are among the first elements of equilibrium which Saul proposes in these lectures.

Man on the Run Tom Doyle 2014 Based on exclusive first-hand interviews, a chronicle of Paul McCartney's struggles in the first decade after the Beatles' breakup discusses his reclusive life, substance abuses, arrests, and efforts to launch his band Wings.

A Hart Life Colin Hart 2012-08 Colin Hart, the former Deep Purple and Rainbow tour manager devoted over thirty years of his life to these great rock musicians. This is his story and indeed theirs. A tale of excess in terms of greed, petulance, anger and devotion. It is counter balanced by extremes of pure talent, showmanship and, of course musicianship. He was the constant 'man in the middle' through all of the break ups, make-ups and revolving door line-up changes. Joining them at twenty-four years old and leaving with a curt email dismissal thirty years later, he was there every step of their rock 'n' roll way. A story of two of the most innovative, often copied, rock bands; seen through the eyes, ears and emotions of their 'mother hen' (as Jon Lord described him). He was their minder, chauffeur, carer, provider, protector, father confessor & confidant. In truth he is the only one who can tell this tale of both bands as he was the only one there on the road throughout the life of, not one, but both gigantic bands.

Religion and Social Policy Paula D. Nesbitt 2001 Religion and Social Policy explores how religious concerns influence those who shape and those who are shaped by policies. It queries the social teachings of global denominations and local congregations, as well as the implicit religious stances taken by national governments and international NGOs. For students of religion, sociology, politics or public policy, Religion and Social Policy offers an excellent overview of how the sacred and the secular mix in both the theory and practice of creating a just society.

The End of Kings William R. Everdell 2000-04-15 Written in clear, lively prose, The End of Kings traces the history of republican governments and the key figures that are united by the simple republican maxim: No man shall rule alone. Breathtaking in its scope, Everdell's book moves from the Hebrew Bible, Solon's Athens and Brutus's Rome to the impeachment trial of Andrew Johnson and the Watergate proceedings during which Nixon resigned. Along the way, he carefully builds a definition of "republic" which distinguishes democratic republics from aristocratic ones for both history and political science. In a new foreword, Everdell addresses the impeachment trial of President Clinton and argues that impeachment was never meant to punish private crimes. Ultimately, Everdell's brilliant analysis helps us understand how examining the past can shed light on the present. "[An] energetic, aphoristic, wide-ranging book." —Marcus Cunliffe, Washington Post Book World "Ambitious in conception and presented in a clear and sprightly prose. . . . [This] excellent study . . . is the best statement of the republican faith since Alphonse Aulard's essays almost a century ago." —Choice "A book which ought to be in the hand of every American who agrees with Benjamin Franklin that the Founding Fathers gave us a Republic and hoped that we would be able to keep it."-Sam J. Social Policy and Religion Peter Herrmann 2013-01-01 Today's society is marked by a fundamental ambiguity: On the one hand we find the loss in old values and systems, in particular what is called secularisation, and the loss of the stronghold of religious institutions. However, at the same time we find the opposite: rather than the loss of confidence in religion, the loss of confidence in citizenship and the institutions of the welfare state. As a conservative answer, policies based in family and religion are constructed and offered as new doctrines as well as for new social policies. The borders between different traditional positions are blurred in this process: conservative and progressive positions claim the turn to communitarian values. This book is a valuable contribution to current debates, looking at the background of faith systems, their understanding and claims, and the limitations in answering the challenges of modernising societies. *Jewish History, Jewish Religion* Israel Shahak 1994-04-28 'Shahak subjects the whole history of Orthodoxy ... to a hilarious and scrupulous critique.' -- Christopher Hitchens, The Nation

On Escalation Herman Kahn 2017-07-12 In this widely discussed and influential book, Herman Kahn probes the dynamics of escalation and demonstrates how the intensification of conflict can be depicted by means of a definite escalation ladder, ascent of which brings opponents closer to all-out war. At each rung of the ladder, before the climb proceeds, decisions must be made based on numerous choices. Some are clear and obvious, others obscure, but the options are always there. Thermonuclear annihilation, says Kahn, is unlikely to come through accident; but nations may elect to climb the ladder to extinction. The basic material for the book was developed in briefings delivered by Kahn to military and civilian experts and revised in the light of his findings of a trip to Vietnam in the 1960s. In On Escalation he states the facts squarely. He asks the reader to face unemotionally the terrors of a world fully capable of suicide and to consider carefully the alternatives to such a path. In the never-never land of nuclear warfare, where nuclear incredulity is pervasive and paralyzing to the imagination even for the professional analyst, salient details of possible scenarios for the outbreak of war, and even more for war fighting, are largely unexplored or even unnoticed. For scenarios in which war is terminated, the issues and possibilities of which are almost completely unstudied, the situation is even worse. Kahn's discussion throws light on the terrain and gives the individual a sense of the range of possibilities and complexities involved and are useful.

Diaspora Greg Egan 1997-09-03 In 2975, the orphan Yatima is grown from a randomly mutated digital mind seed in the conceptory of Konishi polis. Yatima explores the Coalition of Polises, the network of computers where most life in the solar system now resides, and joins a friend, Inoshiro, to borrow an abandoned robot body and meet a thriving community of "fleshers" in the enclave of Atlanta. Twenty-one years later, news arrives from a lunar observatory: gravitational waves from Lac G-1, a nearby pair of neutron stars, show that the Earth is about to be bathed in a gamma-ray flash created by the stars' collision — an event that was not expected to take place for seven million years. Yatima and Inoshiro return to Atlanta to try to warn the fleshers, but meet suspicion and disbelief. Some lives are saved, but the Earth is ravaged. In the aftermath of the disaster, the survivors resolve to discover the cause of the neutron stars' premature collision, and they launch a thousand polises into interstellar space in search of answers. This diaspora eventually reaches a planet subtly transformed to encode a message from an older group of travellers: a greater danger than Lac G-1 is imminent, and the only escape route leads beyond the visible universe.

The Jewish Mind Raphael Patai 1996 A landmark exploration of Jewish history and culture. First published in 1977, The Jewish Mind provides a penetrating insight into the complex collective reality of the Jewish people. Raphael Patai examines how six great historical encounters, spanning three millennia, between the Jews and other cultures led to both change and continuity in Jewish communities throughout the global diaspora. A timeless analysis by a prominent scholar, Patai, a noted cultural anthropologist and historian, drew on a lifetime of research and personal experience to explore the contemporary Jewish mind in its many manifestations, including an exploration of the notion of Jews as a race, an investigation into Jewish intelligence and talents, as discussion of Jewish self-hate, and a profile of Jewish personality and character. An insightful new foreword by Ari L. Goldman. Bestselling author and journalist Ari L. Goldman places the book in the context of recent turbulent events, especially in the Middle East, and confirms Patai's conclusion that Judaism remains enormous value to humankind. Goldman calls the book "a brilliant and absorbing survey of everything poured into the Jewish mind over the millennia." The Jewish Mind is a towering work of scholarship that remains relevant to anyone trying to understand Jewish culture and society around the world today. Book jacket.

Systems of Survival Jane Jacobs 2016-08-17 With intelligence and clarity of observation, the author of The Death and Life of Great American Cities addresses the moral values that underpin working life. In Systems of Survival, Jane Jacobs identifies two distinct moral syndromes—one governing commerce, the other, politics—and explores what happens when these two syndromes collide. She looks at business fraud and criminal enterprise, government's overextended subsidies to agriculture, and transit police who abuse the system they are supposed to enforce, and asks us to consider instances in which snobbery is a virtue and industry a vice. In this work of profound insight and elegance, Jacobs gives us a new way of seeing all our public transactions and encourages us towards the best use of our natural inclinations.

Life Inc Douglas Rushkoff 2011-01-04 Now includes "The Life Inc. Guide to Reclaiming the Value You Create" In Life Inc, award-winning writer Douglas Rushkoff traces how corporations went from being convenient legal fictions to being the dominant fact of contemporary life. The resulting ideology, corporatism, has infiltrated all aspects of civics, commerce, and culture—from the founding of the first chartered monopoly to the branding of the self, from the invention of central currency to the privatization of banking, from the Victorian Great Exhibition to the solipsism of Facebook. Life Inc explains why we see our homes as investments rather than places to live, our 401(k) plans as the ultimate measure of success, and the Internet as just another place to do business. Most important, Rushkoff illuminates both how we've become disconnected from our world and how we can reconnect to our towns, to the value we can create, and, mostly, to one another. As the speculative economy collapses under its own weight, Life Inc shows us how to build a real and human-scaled society to take its place.

Dark Age Ahead Jane Jacobs 2010-06-25 Visionary thinker Jane Jacobs uses her authoritative work on urban life and economies to show us how we can protect and strengthen our culture and communities. In Dark Age Ahead, Jane Jacobs identifies five pillars of our culture that we depend on but which are in serious decline: community and family; higher education; the effective practice of science; taxation and government; and self-policing by learned professions. The decay of these pillars, Jacobs contends, is behind such ills as environmental crisis, racism and the growing gulf between rich and poor; their continued degradation could lead us into a new Dark Age, a period of cultural collapse in which all that keeps a society alive and vibrant is forgotten. But this is a hopeful book as well as a warning. Jacobs draws on her vast frame of reference -- from fifteenth-century Chinese shipbuilding to zoning regulations in Brampton, Ontario -- and in highly readable, invigorating prose offers proposals that could arrest the cycles of decay and turn them into beneficent ones. Wise, worldly, full of real-life examples and accessible concepts, this book is an essential read for perilous times.

The Camorra Tom Behan 2005-08-18 Over the last twenty years the camorra of Naples and the surrounding region has risen to a level of strength rivalling that of the Sicilian mafia. This is not a new organization: the Camorra first emerged in the last century, several decades before the mafia. Tom Behan traces the history of the organization from its inception to the present. Until the 1970s the extent of its influence fluctuated, although it always maintained close relationships with the politicians of the region. However, since the 1970s new and more powerful forms of camorra have developed: Raffaele Cutola's 'mass camorra' of unemployed youth specialise in protection rackets, Lorenzo Nuvoletta's 'business camorra' has reinvested drug money into construction following the 1980 earthquake, and Carmine Alfieri's 'political camorra' has become extremely profitable through its ability to obtain public sector contracts. The Camorra is a fascinating account of the transformation of the small-time cigarette smugglers of the 1960s to the international entrepreneurs of the 1990s. **Life is with People** Mark Zborowski 1972
