*Image and Mind* Stephen Michael Kosslyn 1980 Are images an important means of recalling information from memory and solving problems? Or are images just display lights on the mind's computer? In *Image and Mind*, Stephen Kosslyn makes an impressive case for the view that images are critically involved in the life of the mind. In a series of ingenious experiments, he provides hard evidence that people can construct elaborate mental images, search them for specific information, and perform such other internal operations as mental rotation. Kosslyn demonstrates that these results are best explained by a two-tiered model in which images are stored in abstract form in long-term memory and then assembled for internal display in much the way that images on a TV screen can be created from files in a computer memory. Kosslyn shows how this model can be used to solve many of the persistent questions which have traditionally plagued theories of imagery that attempted to install imagery as the exclusive medium of mental representation. Unlike any other work on imagery, *Image and Mind* provides an integrated account of most of the modern empirical results from imagery research within the framework of a coherent theory. The book also introduces a host of new experimental techniques and major hypotheses to guide future research. The result is a landmark book and a major event in the study of the mind.

**Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction** Beatrix Busse 2020-08-03 Reference to or quotation from someone's speech, thoughts, or writing is a key component of narrative. These reports further a narrative, make it more interesting, natural, and vivid, ask the reader to engage with it, and reflect historical cultural understandings of modes of discourse presentation. To a large extent, the way we perceive a story depends on the ways it presents discourse, and along with it, speech, writing, and thought. In this book, Beatrix Busse investigates speech, writing, and thought presentation in a corpus of 19th-century narrative fiction including Frankenstein, Jane Eyre, Wuthering Heights, Oliver Twist, and many others. At the intersection between corpus linguistics and stylistics, this book develops a new corpus-stylistic approach for systematically analyzing the different narrative strategies of discourse presentation in key pieces of 19th-century narrative fiction. Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction identifies diachronic patterns as well as unique authorial styles, and places them within their cultural-historical context. It also suggests ways for automatically identifying forms of discourse presentation, and shows that the presentation of characters' minds reflects an ideological as well as an epistemological concern about what cannot be reported, portrayed, or narrated. Through insightful interdisciplinary analysis, Busse demonstrates that discourse presentation fulfills the function of prospection and encapsulation, marks narrative progression, and shapes readers' expectations.
