The First and Second Derivatives - Dartmouth

So the second derivative of $g(x)$ at $x = 1$ is $g''(1) = 6(1)^2 = 6$; and the second derivative of $g(x)$ at $x = 5$ is $g''(5) = 6(5)^2 = 150$. Therefore the second derivative test tells us that $g(x)$ has a local maximum at $x = 1$ and a local minimum at $x = 5$. Inflection Points Finally, we want to discuss inflection points in the context of the second derivative.
