Edinburgh Like a Local DK Eyewitness 2022-02-08 Experience Edinburgh the local way with this insider's e-guide Home to winding cobblestoned streets, sprawling leafy parks and an arts scene like no other this small but spectacular city is endlessly enticing. But it's not all about Edinburgh Castle and the National Museums. Beyond the well-trodden sights there's a secret side of the city - and who better to guide you to it than the locals? This insider's e-guide includes recommendations from Edinburghers in the know, helping you to discover all their favourite hangout spots and hidden haunts. Enjoy the banter at an old-school Leith boozier, brace yourself for a chilly dip at Portobello beach and browse indie boutiques that champion up-and-coming Scottish design in the city's well-to-do West End. Whether you're a local looking to uncover your city's secrets or a traveller seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience the real side of Edinburgh.

Bulletin United States. Bureau of Entomology 1910

Points and Lines Ernest E. Shult 2010-12-13 The classical geometries of points and lines include not only the projective and polar spaces, but similar truncations of geometries naturally arising from the groups of Lie type. Virtually all of these geometries (or homomorphic images of them) are characterized in this book by simple local axioms on points and lines. Simple point-line characterizations of Lie incidence geometries allow one to recognize Lie incidence geometries and their automorphism groups.

These tools could be useful in shortening the enormously lengthy classification of finite simple groups. Similarly, recognizing ruled manifolds by axioms on light trajectories offers a way for a physicist to recognize the action of a Lie group in a context where it is not clear what Hamiltonians or Casimir operators are involved. The presentation is self-contained in the sense that proofs proceed step-by-step from elementary first principals without further appeal to outside results. Several chapters have new heretofore unpublished research results. On the other hand, certain groups of chapters would make good graduate courses. All but one chapter provide exercises for either use in such a course, or to elicit new research directions.

Serial set (no.0-3099) 1892

London Like a Local DK Eyewitness 2021-10-05 Uncover the London scene with this insider's e-guide Home to world-class art galleries, staggering skyscrapers and a global restaurant scene like no other, this cosmopolitan capital is a cultural colossus. But it's not all about The Tate Modern and the London Eye. Beyond the well-trodden sights lies the real London: a whole other side waiting to be explored. We've spoken to the city's locals to unearth the coolest hangout spots, hidden gems and personal favourites to ensure you travel like a local. Browse hidden markets for vintage treasures, tuck into a Sunday roast at cosy pubs and socialize with a glass of wine at a museum late. Whether you're a Londoner looking to uncover your city's secrets or seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience London beneath the surface.

List of Lights and Fog Signals 1962

A List of Works on North American

Entomology Altus Lacy Quaintance 1912

Art History at the Crossroads of Ireland and the United States Cynthia Fowler 2022-05-13

Taking the visual arts as its focus, this anthology explores aspects of cultural exchange between Ireland and the United States. Art historians from both sides of the Atlantic examine the work of artists, art critics and art promoters. Through a close study of selected paintings and sculptures, photography and exhibitions from the nineteenth century to the present, the depth of the relationship between the two countries, as well as its complexity, is revealed. The book is intended for all who are interested in Irish/American interconnectedness and will be of particular interest to scholars and students of art history, visual culture, history, Irish studies and American studies.

Berlin Like a Local DK Eyewitness 2022-02-08

Experience Berlin the local way with this insider's e-guide Home to legendary street food, idyllic swimming lakes and a clubbing scene like no other, this vibrant city is endlessly enticing. But it's not all about the Reichstag and the East Side Gallery. Beyond the well-trodden sights there's a secret side of the city - and who better to guide you to it than the locals? This insider's e-guide includes recommendations from Berliners in the know, helping you to discover all their favourite hangout spots and hidden haunts. Browse long-standing flea markets in Kreuzberg, linger over a drink at the city's oldest beer garden and ponder avant-garde art in Mitte's underground galleries. Whether you're a Berliner looking to uncover your city's secrets or a traveller seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience the real side of Berlin.

Brooklyn!, 3rd Edition Ellen Freudenheim

2004-04 Completely updated and expanded, this comprehensive guide to the history, attractions, and unique characteristics of the nation's fourth largest city discusses the trendy neighborhoods, art scene, colorful restaurants, shopping opportunities, nightlife, performing venues, ethnic communities, and other features that

combine to create Brooklyn. Original.

The Geometric Vein C. Davis 2012-12-06

Geometry has been defined as that part of mathematics which makes appeal to the sense of sight; but this definition is thrown in doubt by the existence of great geometers who were blind or nearly so, such as Leonhard Euler. Sometimes it seems that geometric methods in analysis, so-called, consist in having recourse to notions outside those apparently relevant, so that geometry must be the joining of unlike strands; but then what shall we say of the importance of axiomatic programmes in geometry, where reference to notions outside a restricted repertory is banned? Whatever its definition, geometry clearly has been more than the sum of its results, more than the consequences of some few axiom sets. It has been a major current in mathematics, with a distinctive approach and a distinctive spirit. A current, furthermore, which has not been constant. In the 1930s, after a period of pervasive prominence, it appeared to be in decline, even passe. These same years were those in which H. S. M. Coxeter was beginning his scientific work. Undeterred by the unfashionability of geometry, Coxeter pursued it with devotion and inspiration. By the 1950s he appeared to the broader mathematical world as a consummate practitioner of a peculiar, out-of-the-way art. Today there is no longer anything that out-of-the-way about it. Coxeter has contributed to, exemplified, we could almost say presided over an unanticipated and dramatic revival of geometry.

Copenhagen Like a Local DK Eyewitness

2022-02-08 Experience Copenhagen the local way with this insider's e-guide Home to cutting-edge design museums, stylish cocktail bars and a foodie scene like no other, this cool Scandi city is endlessly enticing. But it's not all about the Tivoli Gardens and Nyhavn. Beyond the well-trodden sights there's a secret side of the city - and who better to guide you to it than the locals? This insider's e-guide includes recommendations from Copenhageners in the know, helping you to discover all their favourite hangout spots and hidden haunts. Enjoy New Nordic cuisine at one of the world's best restaurants, take a dip in the

inner city harbour and check out the street art in Freetown Christiania. Whether you're a Copenhagener looking to uncover your city's secrets or a traveller seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience the real side of Copenhagen.

A New Species of Pityogenes James Malcolm Swaine 1915

Aestheticizing Public Space Lu Pan

2015-01-06 A photo collage of past and present street visuals in Asia, *Aestheticizing Public Space* explores the domestic, regional, and global nexus of East Asian cities through their graffiti, street art and other visual forms in public space. Attempting to unfold the complex positions of these images in the urban spatial politics of their respective regions, Lu Pan explores how graffiti in East Asia reflects the relationship between aesthetics and politics. The book situates itself in a contested dynamic relationship among human bodies, visual modernity, social or moral norms, styles, and historical experiences and narratives. On a broader level, this book aims to shed light on how aesthetics and politics are mobilized in different contested spaces and media forms, in which the producer and the spectator change and exchange their identities.

A Text-book of Military Engineering Junius Brutus Wheeler 1883

Leisure Marketing Susan Horner 2012-06-25

Divided into nine parts, *Leisure Marketing*: a global perspective guides the reader through leisure and marketing concepts, the marketing mix, key issues in different sectors, topical issues (such as globalisation, marketing research and ethics, for example branding and environmental issues), and the future of leisure marketing. A section of the book is devoted entirely to international case studies, which illustrate and highlight key themes and issues raised throughout in order to facilitate learning. Example of international cases used are: Disneyland Resort, Paris: The Marketing Mix Manchester United Football Club: Marketing the Brand The Growth of the Online Retail Travel Market Hilton Head Island, USA: The Leisure Island for Golf and Leisure Shopping Health, Leisure and Tourism Marketing including Spa Hotels, Health Clubs and lake Resorts. This book

combines real world experience with a solid theoretical framework. It is essential reading for anyone studying, teaching or working in marketing in the leisure industry.

Spons' Dictionary of Engineering, Civil, Mechanical, Military, and Naval Edward Spon 1870

Face Processing: Advanced Modeling and Methods Wenyi Zhao 2011-07-28 Major strides have been made in face processing in the last ten years due to the fast growing need for security in various locations around the globe. A human eye can discern the details of a specific face with relative ease. It is this level of detail that researchers are striving to create with ever evolving computer technologies that will become our perfect mechanical eyes. The difficulty that confronts researchers stems from turning a 3D object into a 2D image. That subject is covered in depth from several different perspectives in this volume. *Face Processing: Advanced Modeling and Methods* begins with a comprehensive introductory chapter for those who are new to the field. A compendium of articles follows that is divided into three sections. The first covers basic aspects of face processing from human to computer. The second deals with face modeling from computational and physiological points of view. The third tackles the advanced methods, which include illumination, pose, expression, and more. Editors Zhao and Chellappa have compiled a concise and necessary text for industrial research scientists, students, and professionals working in the area of image and signal processing. Contributions from over 35 leading experts in face detection, recognition and image processing Over 150 informative images with 16 images in FULL COLOR illustrate and offer insight into the most up-to-date advanced face processing methods and techniques Extensive detail makes this a need-to-own book for all involved with image and signal processing

Dublin Like a Local DK Eyewitness 2021-10-05

Experience authentic Dublin with this insider's e-guide Home to vibrant art centers, a world-renowned nightlife scene, and a literary heritage like no other, this convivial city is endlessly enticing. But beyond the well-trodden sights of Trinity College and the lively pubs that line Temple Bar lies the real Dublin: a whole other

side waiting to be explored. We've spoken to the city's locals to unearth the coolest hangout spots, hidden gems, and personal favorites to ensure you experience the city as they do. Enjoy the craic over a whiskey at an Irish distillery, hang with the students at underground live music venues and soak up the city's artistry at the markets that fill its quieter Georgian squares. Whether you're a Dubliner looking to uncover your city's secrets or seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience Dublin beneath the surface.

Geometries and Groups M. Aschbacher

2012-12-06 The workshop was set up in order to stimulate the interaction between (finite and algebraic) geometries and groups. Five areas of concentrated research were chosen on which attention would be focused, namely: diagram geometries and chamber systems with transitive automorphism groups, geometries viewed as incidence systems, properties of finite groups of Lie type, geometries related to finite simple groups, and algebraic groups. The list of talks (cf. page iii) illustrates how these subjects were represented during the workshop. The contributions to these proceedings mainly belong to the first three areas; therefore, (i) diagram geometries and chamber systems with transitive automorphism groups, (ii) geometries viewed as incidence systems, and (iii) properties of finite groups of Lie type occur as section titles. The fourth and final section of these proceedings has been named graphs and groups; besides some graph theory, this encapsules most of the work related to finite simple groups that does not (explicitly) deal with diagram geometry. A few more words about the content: (i).

Diagram geometries and chamber systems with transitive automorphism groups. As a consequence of Tits' seminal work on the subject, all finite buildings are known. But usually, in a situation where groups are to be characterized by certain data concerning subgroups, a lot less is known than the full parabolic picture corresponding to the building.

Gallery G 2006 Contains material such as art exhibition catalogues, invitations and ephemeral items relating to Australian artists exhibiting in Queensland galleries.

Austin Like a Local DK Eyewitness 2022-02-08

Experience Austin the local way with this insider's e-guide Home to a world-class live music scene, countless independent stores and a sense of community like no other, this Texas city is endlessly enticing. But it's not all about the State Capitol and SXSW. Beyond the well-trodden sights there's a secret side of the city - and who better to guide you to it than the locals? This insider's e-guide includes recommendations from Austinites in the know, helping you to discover all their favourite hangout spots and hidden haunts. Start your day with a breakfast taco from an east-side food truck, take a dip in one of the many swimming holes and dance the two step at a honky tonk in South Austin. Whether you're an Austinite looking to uncover your city's secrets or a traveller seeking an authentic experience beyond the tourist track, this stylish guide makes sure you experience the real side of Austin.

But beyond the well-trodden sights of the Golden Gate Bridge and Pier 39 lies the real San Francisco: a whole other side waiting to be explored. We've spoken to the city's locals to unearth the coolest hangout spots, hidden gems, and personal favorites to ensure you travel like a local. Amble up secret stairways to pocket parks, browse record stores tucked away in colorful neighborhoods, and tuck into Mexican cuisine at tiny hole-in-the-wall

joints. Whether you're a San Franciscan looking to uncover your city's secrets or seeking an authentic experience beyond the tourist track, this stylish e-guide makes sure you experience San Francisco beneath the surface.

Buildings of Spherical Type and Finite BN-Pairs

J. Tits 2009-02-05 These notes are a slightly revised and extended version of mimeographed notes written on the occasion of a seminar on buildings and BN-pairs held at Oberwolfach in April 1968. Their main purpose is to present the solution of the following two problems: (A) Determination of the buildings of rank $>$; and irreducible, spherical type, other than \sim and H ("of spherical type" means "with finite Weyl 4 group", about the excluded types H, cf. the addenda on p. 274). Roughly speaking, those buildings all turn out to be associated to simple algebraic or classical groups (cf. 6. 1.; 6. 1.; 8. 4. ; 8. 22, 9. 1, 10. 2). An easy application provides the enumeration of all finite groups with BN-pairs of irreducible type and rank $>$; up to normal subgroups contained in B (cf. 11. 7). (B) Determination of all isomorphisms between buildings of rank > 2 and spherical type associated to algebraic or classical simple groups and, in particular, description of the full automorphism groups of such buildings (cf. 5. 8, 5. 9, 5. 10, 6. 6, 6. 1.; 8. 6, 9. ; 10. 4). Except for the appendices, the notes are rather strictly oriented - ward these goals.

Crisis and Ambition Barbara Borg 2013-10-03 Tombs and burial customs are an exquisite source for social history, as their commemorative character determines them to express much of the contemporaneous ideology of a society. This book presents, for the first time, a holistic view of the funerary culture of Rome and its surroundings during the third century AD. Barbara Borg argues that during this time there was, in many ways, a return to practices known from the Late Republic and early imperial period, with spectacular monuments for the rich, and a large-scale reappearance of collective burial spaces. Through a study of terraced tombs, elite monuments, the catacomb nuclei, sarcophagi, and painted imagedecoration, this volume explores how the third century was an exciting period of experimentation and creativity.

Congressional Record United States. Congress The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
