Contemporary Issues in Early Childhood Education in Germany Wilfried Smidt 2018-07-26 The importance of early childhood education has been emphasized by a large body of research that has demonstrated that children's cognitive and socio-emotional development is significantly influenced by the quality of the education and care received from their families and in preschool. Consequently, it is important to investigate factors that pertain to the provision of a high-quality education and high-quality care for young children. This book addresses several important issues that are currently under discussion with respect to this topic. In particular, the book focuses on three topics presently under debate: the professionalization of pedagogues working in the field of early childhood education; the quality of education and care provided by families and preschools; and the promotion of children from socio-economically disadvantaged families. Providing an excellent overview of current research in Germany, this book will be useful to readers who are interested in international perspectives on early childhood education and who want to gain insight into relevant topics discussed in other countries. This book was originally published as a special issue of Early Child Development and Care.

Heart Failure, An Issue of Critical Nursing Clinics, E-Book Jennifer Kitchens 2016-01-07 Heart failure is the only cardiovascular disease that is increasing. The impact on

the critical care environment and the health care system, as a whole, is significant from both a cost and burden to the system perspective. There are 6.5 million hospital days a year and nearly \$40 billion dollars in yearly health care costs attributed to heart failure in the United States. There are more Medicare monies spent for diagnosing and treating heart failure than any other Diagnosis Related Group. There is a 24% hospital re-admission rate for this diagnosis which leads to financial implications for health care systems. The human cost is also significant. Less than half of Americans diagnosed with heart failure survive greater than 5 years. The ongoing health care needs and cost of this chronic disease takes a significant toll on patients' finances, time and quality of life. Over \$2.9 billion dollars is spent annually on the pharmaceutical management of heart failure in the United States. This diagnosis is the leading cause of hospitalization for patients who are 65 years of age and older. Few health care providers in the critical care environment are not affected by heart failure on a routine basis. Caring for these patients and their families is both a challenging and yet a rewarding experience. This edition will provide critical care nurses with a comprehensive heart failure review which is essential in caring for this challenging population given the dynamic health and critical care environments.

Ethical and Political Approaches to Nonhuman Animal Issues Andrew Woodhall 2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face. The recent ‘political turn’ in interspecies ethics, from ethical to political approaches, has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches. Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches. This book offers alternative positions such as cosmopolitan, libertarian, and left humanist thought, as well as applying ethical and political thought to specific issues, such as experimentation, factory farming, nonhuman political agency, and intervention. Presenting work by theorists and activists, insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era.

EBOOK: Diversity and Difference in Childhood: Issues for Theory and Practice Kerry Robinson 2017-01-16 Educators and community-based professionals are often required to work with children and families from a range of diverse backgrounds. The second edition of this popular book goes beyond simplistic definitions of diversity, encouraging a much broader understanding and helping childhood educators and community-based professionals develop a critical disposition towards assumptions about children and childhood in relation to diversity, difference and social justice. As well as drawing on research, the book gives an overview of relevant contemporary social theories, including poststructuralism, cultural studies, critical theory, postcolonialism, critical ‘race’ theory, feminist perspectives and queer theory. It interrogates practice and explores opportunities and strategies for creating a more equitable environment, whilst covering key issues impacting on children’s lives, including: globalization, neoliberalism, new racism, immigration, Indigeneity, refugees, homophobia, heterosexism and constructions of childhood. Each chapter provides an overview of the area of discussion, a focus on the implications for practice, and recommended readings. Providing insight into how social justice practices in childhood education and community-based service delivery can make a real difference in the lives of children, their families and communities, this is key reading for early childhood and primary educators, community-based professionals, university students and researchers. “This thoughtful, topical book addresses a considerable range of diversity issues relevant to teacher educators, their students, and other professionals who work with children and their families within and beyond Australia. Indigenous issues including language maintenance and revival have particular relevance within postcolonial nation states. Other issues of international relevance include: identities and retention of community languages, gender equity, childhood and sexuality, poverty and inequalities, and related policies. The writing is critical, scholarly, and engaging. This timely second edition draws on the authors’ longstanding teacher education experiences, and their most recent research, to revisit the challenges of diversity and difference in children’s lives”. Dr Valerie N. Podmore, former associate professor, Faculty of Education and Social Work, the University of Auckland, New Zealand “The second edition of Robinson and Jones Diaz’s Diversity and Difference in Childhood is a thoroughly welcome addition to my list of key texts for students of early childhood and childhood studies. It provides a means from the outset for educating undergraduate students from within critical postmodern and post structural perspectives – thus orienting their views of and actions within their future professions towards critical and equitable practices that value difference rather than treat is as a problem to be solved. Furthermore, for practitioners who find themselves questioning modernist constructions of children, development, difference, diversity and their work, the book provides a thorough grounding in frameworks and tools that will help them re-theorise what they are doing whilst simultaneously supporting them towards positive change.” Alexandra C. Gunn, Associate Dean (Teacher Education), University of Otago College of Education, New Zealand “This is the 21st century early childhood education text. Diversity and Difference in Childhood provides early childhood educators and scholars a powerful space for asking social justice questions in a profoundly innovative way. Diversity and difference in childhood is not a ‘traditional’ early childhood conversation. As the authors appropriately suggest, this book is for educators to challenge taken for granted knowledges/practices and to take “personal and professional risks for social justice”. Veronica Pacini-Ketchabaw, Ph.D., Professor, School of Child and Youth Care, University of Victoria, Canada “This new edition of Diversity and Difference is both important and timely. There is a new urgency to some emerging childhood issues, including those associated with childhood sexuality, and a distinct lack of critical resources to inform the debate. This book helps fill this gap. Undertaking a major revision and incorporating new material, the authors have ensured the book’s continued relevance and renewed significance in the very dynamic context of childhood studies. The book makes an important contribution to resourcing explorations of the many difficult and complex issues associated with childhood in a globalised yet differentiated world. Readers will find the new theoretical resources and additional chapters that have been included give the book a sense of enhanced rigour and its depth and breadth of coverage make it an ideal resource for a wide variety of interests and perspectives.” Christine Woodrow, Associate Professor and Senior Researcher, the Centre for Educational Research, Western Sydney University, Australia

Legal Issues in Global Contexts Kirk St. Amant 2016-12-05 Today, it has been said, the world is "flat," as online media allow information to move easily from point to point across the earth. International legal differences, however, are increasingly affecting the ease with which data and ideas can be shared across nations. Copyright law, for example, affects the international flow of materials by stipulating who has the right to replicate or to share certain kinds of content. Similarly, perspectives on privacy rights can differ from nation to nation and affect how personal information is shared globally. Moreover, national laws can affect the exchange of ideas by stipulating the language in which information must be presented in different geopolitical regions. Today's technical communicators need to understand how legal factors can affect

communication practices if they wish to work effectively in global contexts. This collection provides an overview of different legal aspects that technical communicators might encounter when creating materials or sharing information in international environments. Through addressing topics ranging from privacy rights and information exchange to the legalities of business practices in virtual worlds and perspectives on authorship and ownership, the contributors to this volume examine a variety of communication-based legal issues that can cause problems or miscommunication in international interactions. Reviewing such topics from different perspectives, the authors collectively provide ideas that could serve as a foundation for creating best practices on or for engaging in future research in the area of legal issues in international settings.
