Prophets and Ghosts Samuel J. Redman 2021-10-26 A searching account of nineteenth-century salvage anthropology, an effort to preserve the culture of “vanishing” Indigenous peoples through dispossession of the very communities it was meant to protect. In the late nineteenth century, anthropologists, linguists, archaeologists, and other chroniclers began amassing Indigenous cultural objects—crafts, clothing, images, song recordings—by the millions. Convinced that Indigenous peoples were doomed to disappear, collectors donated these objects to museums and universities that would preserve and exhibit them. Samuel Redman dives into the archive to understand what the collectors deemed the tradition of the “vanishing Indian” and what we can learn from the complex legacy of salvage anthropology. The salvage catalog betrays a vision of Native cultures clouded by racist assumptions—a vision that had lasting consequences. The collecting practice became an engine of the American museum and significantly shaped public education and preservation, as well as popular ideas about Indigenous cultures. Prophets and Ghosts teases out the moral challenges inherent in the salvage project.

Preservationists successfully maintained an important human inheritance, sometimes through collaboration with Indigenous people, but collectors’ methods also included outright theft. The resulting portrait of Indigenous culture reinforced the public’s confidence in the hierarchies of superiority and inferiority invented by “scientific” racism. Today the same salvaged objects are sources of invaluable knowledge for researchers and museum visitors. But the question of what should be done with such collections is nonetheless urgent. Redman interviews Indigenous artists and curators, who offer fresh perspectives on the history and impact of cultural salvage, pointing to new ideas on how we might contend with a challenging inheritance.

**The Urban Wisdom of Jane Jacobs** Sonia Hirt 2012 Here for the first time is a thoroughly interdisciplinary and international examination of Jane Jacobs's legacy. Divided into four parts: I. Jacobs, Urban Philosopher; II. Jacobs, Urban Economist; III. Jacobs, Urban Sociologist; and IV. Jacobs, Urban Designer, the book evaluates the impact of Jacobs's writings and activism on the city, the professions dedicated to city-building and, more generally, on human thought. Together, the editors and contributors highlight the notion that Jacobs's influence goes beyond planning to philosophy, economics, sociology and design. They set out to answer such questions as: What explains Jacobs's lasting appeal and is it justified? Where was she right and where was she wrong? What were the most important themes she addressed? And, although Jacobs was best known for her work on cities, is it correct to say that she was a much broader thinker, a philosopher, and that the key to her lasting legacy is precisely her exceptional breadth of thought?

**Working in the Killing Fields** Howard Ball 2015-04-15 While the specifics of individual wars vary, they share a common epilogue: the task of finding and identifying the "disappeared." The Bosnian war of the early 1990s, which destroyed the sovereign state of Yugoslavia, is no exception. In *Working in the Killing Fields*, Howard Ball focuses on recent developments in the technology of forensic science and on the work of forensic professionals in Bosnia following that conflict. Ball balances the examination of complex features of new forensic technology with insights into the lives of the men and women from around the globe who are tasked with finding and excavating bodies and conducting pathological examinations. Having found the disappeared, however, these same pathologists must then also explain the cause of death to international-court criminal prosecutors and surviving families of the victims. Ball considers the physical dangers these professionals regularly confront while performing their site excavations, as well as the emotional pain, including post-traumatic stress disorder, they contend with while in Bosnia and after they leave the killing fields. *Working in the Killing Fields* integrates discussion of cutting-edge forensic technology into a wider view of what these searches mean, the damage they do to people, and the healing and good they bring to those in search of answers. Even though the Balkan wars took place two decades ago, the fields where so many men, women, and children died still have gruesome and disturbing stories to tell. Ball puts the spotlight on the forensic professionals tasked with telling that story and on what their work means to them as individuals and to the wider world's understanding of genocide and war.

*Late Victorian Crime Fiction in the Shadows of Sherlock C.* Clarke 2014-09-26 This book investigates the development of crime fiction in the

1880s and 1890s, challenging studies of late-Victorian crime fiction which have given undue prominence to a handful of key figures and have offered an over-simplified analytical framework, thereby overlooking the generic, moral, and formal complexities of the nascent genre.

*The Political Legacies of Barry Goldwater and George McGovern* J. Volle 2010-10-25 This book is about redemption for people on the right and left of the political spectrum who can be proud of two politicians, Senator's Barry Goldwater and George McGovern, who demonstrated that defeat can be accepted with decency and honor.

*Kashmir after 2019* Werner Menski 2021-09-20 Kashmir after 2019: Completing the Partition studies the post-2019 Kashmir situation, using an interdisciplinary conceptual framework by employing the kite methodology to analyse law-related conflict scenarios, facilitating a rigorous stakeholder analysis. The unfinished Partition of the Indian subcontinent on 14/15 August 1947 left Jammu and Kashmir hanging between visions of azadi (freedom) and competing territorial claims of India and Pakistan. This limbo, causing mounting costs over time, ultimately brought intolerable sufferings to the diverse Kashmiri people. The book is a passionate search for a peaceful future, looking ahead to post-2019 arrangements. It provides a historically grounded contextual analysis to explain why, by 2019, the time had finally become ripe for allowing India and Pakistan as the respective 'other' to keep the parts of Kashmir they have each been holding since 1947. This future-oriented and solution-driven edited book offers a diversity-conscious theoretical framework—the kite model—which suggests completing the process of Partition as necessary mental growth of identity formation.

**Women Willing to Fight** Silke Andris 2009-01-23 *Women Willing to Fight* is a collection of essays that explores the presence of the fighting woman in contemporary Hollywood cinema. Drawn from a variety of genres, the authors examine the changing role, image and position of this figure in film over recent decades. The increasing dominance of this character and her repositioning as a protagonist reinvigorates discussion concerning the dynamics of film narrative and spectacle. Each contribution takes as its focus a central character from the Hollywood

blockbuster era, examining in detail the motivations and implications of the fighting female. In doing so the collection raises significant questions about the place of the fighting woman in contemporary media and the relationships she forges on and off-screen. With a strong appreciation of the mixed messages inherent in images of fighting women, *Women Willing to Fight* seeks to draw attention to the embodied forms - physical, intellectual and emotional - through which female fighters are represented. The anthology places particular emphasis on the emergence of the physically empowered woman, a character for whom the body has become a weapon and a target. While early cinematic representations allowed women to voice their fury and frustration, today's female fighters not only 'speak up' but 'muscle up'. Putting aside the supernatural powers of many action heroines, this volume focuses on the kinds of fighting skills, abilities and desires that are engendered in characterisations of mortal women. To this end the volume implicitly addresses complex and cross-cultural notions of 'extra-ordinary' power. By examining the embodied arsenal that these characters possess and develop - through training, conditioning, and life experience - it considers the representation of motivation and metamorphoses into 'the fighting woman': how a woman fights holds implicit meaning and inevitably urges us to consider why and what she is fighting for.

**Designing Experiments for the Social Sciences** Renita Coleman 2018-08-27 "This book is a must for learning about the experimental design—from forming a research question to interpreting the results this text covers it all." –Sarah El Sayed, University of Texas at Arlington *Designing Experiments for the Social Sciences: How to Plan, Create, and Execute Research Using Experiments* is a practical, applied text for courses in experimental design. The text assumes that students have just a basic knowledge of the scientific method, and no statistics background is required. With its focus on how to effectively design experiments, rather than how to analyze them, the book concentrates on the stage where researchers are making decisions about procedural aspects of the experiment before interventions and treatments are given. Renita

Coleman walks readers step-by-step on how to plan and execute experiments from the beginning by discussing choosing and collecting a sample, creating the stimuli and questionnaire, doing a manipulation check or pre-test, analyzing the data, and understanding and interpreting the results. Guidelines for deciding which elements are best used in the creation of a particular kind of experiment are also given. This title offers rich pedagogy, ethical considerations, and examples pertinent to all social science disciplines.

**Line on Fire** Happymon Jacob 2018-12-24 The India–Pakistan border in Jammu & Kashmir has witnessed repeated ceasefire violations (CFVs) over the past decade. As relations between India and Pakistan have deteriorated, CFVs have increased exponentially. It is imperative to gain a deeper understanding of these violations owing to their potential to not only cause a crisis but also escalate an ongoing one. *Line on Fire*, part of the Oxford International Relations in South Asia series, postulates that the incorrect diagnosis of the reasons behind CFVs has led to wrong policies being adopted by both India and Pakistan to deal with the recurrent violations. Using fresh empirical data and first-hand accounts, the volume attempts to understand the reason why CFVs continue to take place between India and Pakistan despite consistent efforts to reduce the tension between the two nations. In doing so, it recontextualizes and enriches the prevailing arguments in contemporary literature on escalating dynamics and unending ceasefire agreements between the two South Asian nuclear rivals.

**Internet Architecture and Innovation** Barbara Van Schewick 2012-08-24 A detailed examination of how the underlying technical structure of the Internet affects the economic environment for innovation and the implications for public policy. Today—following housing bubbles, bank collapses, and high unemployment—the Internet remains the most reliable mechanism for fostering innovation and creating new wealth. The Internet's remarkable growth has been fueled by innovation. In this pathbreaking book, Barbara van Schewick argues that this explosion of innovation is not an accident, but a consequence of the Internet's architecture—a consequence of technical choices regarding the Internet's

inner structure that were made early in its history. The Internet's original architecture was based on four design principles: modularity, layering, and two versions of the celebrated but often misunderstood end-to-end arguments. But today, the Internet's architecture is changing in ways that deviate from the Internet's original design principles, removing the features that have fostered innovation and threatening the Internet's ability to spur economic growth, to improve democratic discourse, and to provide a decentralized environment for social and cultural interaction in which anyone can participate. If no one intervenes, network providers' interests will drive networks further away from the original design principles. If the Internet's value for society is to be preserved, van Schewick argues, policymakers will have to intervene and protect the features that were at the core of the Internet's success.

**Useful Objects** Reed Gochberg 2021-08-18 *Useful Objects* examines the history of American museums during the nineteenth century through the eyes of visitors, writers, and collectors. Museums of this period included a wide range of objects, from botanical and zoological specimens to antiquarian artifacts and technological models. Intended to promote "useful knowledge," these collections generated broader discussions about how objects were selected, preserved, and classified. In guidebooks and periodicals, visitors described their experiences within museum galleries and marveled at the objects they encountered. In fiction, essays, and poems, writers embraced the imaginative possibilities represented by collections and proposed alternative systems of arrangement. These conversations interrogated many aspects of American culture, raising deep questions about how objects are interpreted—and who gets to decide their value. Combining literary criticism, the history of science, and museum studies, *Useful Objects* examines the dynamic and often fraught debates that emerged during a crucial period in the history of museums by drawing on a wide range of archival materials and accounts in fiction, guidebooks, and periodicals. As museums gradually transformed from encyclopedic cabinets to more specialized public institutions, many writers, including J. Hector St. John de Crèvecoeur, Jane Johnston

Schoolcraft, William Wells Brown, Walt Whitman, and Henry David Thoreau, questioned who would have access to collections and the authority to interpret them. Throughout this period, they considered loss and preservation, raised concerns about the place of new ideas, and resisted increasingly fixed categories. Their reflections shaped broader debates about the scope and purpose of museums in American culture that continue to resonate today.

*Understanding and Recognizing Dysfunctional Leadership* Annette B. Roter 2017-06-26 Since the early twentieth century, scholars have researched leadership and it is one of the most researched topics of our time. Understanding how to be a strong leader and what makes a good leader is something that we continue to strive to understand. Research ponders various positive leadership models such as transformational, servant, authentic, charismatic, situational and ethical leadership to name a few. Yet, we find that a small number of our leaders are truly transformational. While scholars continue to provide examples of positive and influential leaders, we still struggle to understand what a dysfunctional leader is. Practitioners and followers are quick to identify a leader that is a nightmare, yet they can't name what type of dysfunction that leader possesses. Day in and day out, we struggle with these leaders and how to intervene when dysfunctional behavior arises. This is most evident with recent scandals that have plagued the media involving characters such as Bernie Madoff, Dennis Kozlowski, Tyco, Enron's Kenneth Lay and Jeff Skilling. It is vital to understand the importance of dysfunctional leadership and its impact on organizations, followers and society. The recent literature focuses on the psychology of dysfunctional leadership and the destruction of organizations. Little has been written in relation to the characteristics, traits and behaviors of dysfunctional leaders. In addition, little has been included on how to deal with this types of behavior within organizations. Individual books have been written on each of these types of characteristics, but no one book has been written that focuses on all of these characteristics and studies the subtle

differences of these behaviors, interventions that can be employed to address this type of behavior and how to recognize the impact on our organizations. Understanding and Recognizing Dysfunctional Leadership will be of interest to professionals and researchers in this field.

**Penetrating Critiques** Leslie Allin 2020-11-03 Tracing the intersections between archival documents and immensely popular adventure fiction set in Africa, *Penetrating Critiques* highlights the anxieties surrounding the vulnerability of the white male body by assessing the destabilization of narrative itself. The author considers texts ranging from private letters, governmental correspondence, periodicals, and archives to the popular works of H. Rider Haggard, Richard Marsh, and Joseph Conrad. These texts trouble the notions of bounded male bodies, impermeable histories, and solid virtues while underscoring the grotesqueness of male forms, narratives, and moralities. Although dominant representations of martial bodies frequently emphasized boundaries, containment, and solidity, the fiction and imperial archives explored in this book expose problems of stability through tropes, images, and material evidence of perforation, penetration, and dissolution. In emphasizing the relationship between institutional imperial writing and popular discourse, *Penetrating Critiques* reveals that more complex, fraught, and critical approaches to imperialism and masculinity were circulating throughout Victorian culture than previously recognized.

Gods at War Student Edition Kyle Idleman 2014-01-28 The next step in becoming a completely committed follower of Jesus False gods war within each and every one of us, fighting for a place of glory and control in our lives. In this student edition of *Gods at War*, Kyle Idleman, bestselling author of *Not a Fan*, demonstrates how the desire for things like popularity, acceptance, and success can become modern-day idols that keep us from truly following Jesus Christ. Behind the everyday pressures, fears, and lack of purpose is a false god who too often is winning the war in our hearts. By asking insightful questions and looking at the issues from a teen's point of view, Idleman reveals which false gods most often take the place of the one true God. Then, using powerful and honest testimonies of people like you who have struggled in each area, *Gods at*

war student edition illustrates a clear path away from the heartache of 21st-century idolatry back to the heart of God.

*A Continent Erupts: Decolonization, Civil War, and Massacre in Postwar Asia, 1945-1955* Ronald H. Spector 2022-08-23 A harrowing history of the conflicts that swept Asia during the decade following World War II—and determined the fate of the continent. The end of World War II led to the United States' emergence as a global superpower. For war-ravaged Western Europe it marked the beginning of decades of unprecedented cooperation and prosperity that one historian has labeled "the long peace." Yet half a world away, in China, Indonesia, Vietnam, Korea, and Malaya—the fighting never really stopped, as these regions sought to completely sever the yoke of imperialism and colonialism with all-too-violent consequences. East and Southeast Asia quickly became the most turbulent regions of the globe. Within weeks of the famous surrender ceremony aboard the U.S.S. Missouri, civil war, communal clashes, and insurgency engulfed the continent, from Southeast Asia to the Soviet border. By early 1947, full-scale wars were raging in China, Indonesia, and Vietnam, with growing guerrilla conflicts in Korea and Malaya. Within a decade after the Japanese surrender, almost all of the countries of South,

East, and Southeast Asia that had formerly been conquests of the Japanese or colonies of the European powers experienced wars and upheavals that resulted in the deaths of at least 2.5 million combatants and millions of civilians. With *A Continent Erupts*, acclaimed military historian Ronald H. Spector draws on letters, diaries, and international archives to provide, for the first time, a comprehensive military history and analysis of these little-known but decisive events. Far from being simply offshoots of the Cold War, as they have often been portrayed, these shockingly violent conflicts forever changed the shape of Asia, and the world as we know it today.

*Blind Conscience* Margot O'Neill 2008 "Mandatory detention of asylum-seekers has been a prominent public issue for almost a decade. It has provoked shame and anger across society, been manipulated politically by all sides and has prompted many to become actively involved in campaigns in support of asylum-seekers. The government's recent response to the crisis precipitated by the arrival of the West Papuans and the widespread protest that followed show that the refugee crisis is not over. Nevertheless the prospects for incarcerated asylum-seekers have improved markedly since the intervention of Petro Georgeiou and other federal Liberal backbenchers. This shift and the time that has passed since the Tampa incident, children overboard and near saturation coverage of individual asylum-seekers provide the opportunity for some reflection. Margot O'Neill has covered many angles of the story herself, but writes now about the way Australian society at large was affected. She uses individuals - activists, psychiatrists, lawyers, politicians, prison guards - with direct experience to tell the broader story. This gives the book a strong narrative drive and a powerful emotional charge."--Provided by publisher.

*The Threat Matrix* Garrett M. Graff 2011-03-28 An intimate look at Robert Mueller, the sixth Director of the FBI, who has just been named special counsel to oversee the investigation into ties between President Trump's campaign and Russian officials. Covering more than 30 years of history, from the 1980s through Obama's presidency, *The Threat Matrix* explores the transformation of the FBI from a domestic law enforcement agency,

handling bank robberies and local crimes, into an international intelligence agency--with more than 500 agents operating in more than 60 countries overseas--fighting extremist terrorism, cyber crimes, and, for the first time, American suicide bombers. Based on access to never-before-seen task forces and FBI bases from Budapest, Hungary, to Quantico, Virginia, this book profiles the visionary agents who risked their lives to bring down criminals and terrorists both here in the U.S. and thousands of miles away long before the rest of the country was paying attention to terrorism. Given unprecedented access, thousands of pages of once secret documents, and hundreds of interviews, Garrett M. Graff takes us inside the FBI and its attempt to protect America from the Munich Olympics in 1972 to the attempted Times Square bombing in 2010. It also tells the inside story of the FBI's behind-the-scenes fights with the CIA, the Department of Justice, and five White Houses over how to combat terrorism, balance civil liberties, and preserve security. The book also offers a never-before-seen intimate look at FBI Director Robert Mueller, the most important director since Hoover himself. Brilliantly reported and suspensefully told, *The Threat Matrix* peers into the darkest corners of this secret war and will change your view of the FBI forever.

### "Star Wars: Jedi Knight"

**Hovering over the face of the deep** Gertrud Yde Iversen 2009 'Why does everyone need to die?', 'Does my hamster have a soul?' Theologians and philosophers have always wrestled with such questions. The articles gathered in this book - which represent recent educational approaches to philosophizing and theologizing with children - are very diverse in approach and emphasis. Nevertheless all underline the importance of supporting children and young people in their efforts to discuss questions of meaning. Quotations in the articles capture with vividness and immediacy their intense engagement with the puzzles of existence. Educators may learn better to support such processes, and by the same token be enriched by the interaction. Such processes resemble the phenomenon of the Black Sun where starlings get together from different directions in large flocks in order to survive the night. Both, as indicated in the title of this book are hovering over the face of the deep. This book

offers a meeting place for theologians and philosophers, and although the conversation does a great deal to clarify their relationship, differences in opinion remain. Its contributors are from Denmark, Germany, the United Kingdom and the United States.

**Ghost-Seers, Detectives, and Spiritualists** Srdjan Smajić 2010-04-29 This book is a study of the narrative techniques that developed for two very popular forms of fiction in the nineteenth century - ghost stories and detective stories - and the surprising similarities between them in the context of contemporary theories of vision and sight. Srdjan Smajić argues that to understand how writers represented ghost-seers and detectives, the views of contemporary scientists, philosophers, and spiritualists with which these writers engage have to be taken into account: these views raise questions such as whether seeing really is believing, how much of what we 'see' is actually only inferred, and whether there may be other (intuitive or spiritual) ways of seeing that enable us to perceive objects and beings inaccessible to the bodily senses. This book will make a real contribution to the understanding of Victorian science in culture, and of the ways in which literature draws on all kinds of knowledge.

**Iraq in the Twenty-First Century** Tareq Y. Ismael 2015-02-20 Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin

that accompanied the Iraq war was an absolute catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable.

*The Day of Islam* Paul L. Williams In two previous books, *Osama's Revenge* and *The Al Qaeda Connection*, seasoned investigative reporter Paul Williams revealed the alarming potential for nuclear terrorism on U.S. soil and the sinister connections among organized crime, illegal immigrants, and al Qaeda. Now, Williams broadens his focus beyond al Qaeda to provide readers with newly uncovered information on terrorist activities in Pakistan, Iran, Iraq, other Muslim countries-and our neighbor Canada! What emerges is a harrowing picture of international terrorist activities, all aimed at the destruction of the United States and the collapse of the Western world. This cataclysm will usher in the Day of Islam, the dream of radical Muslims to see all of humankind fall in submission before the throne of Allah. Based on the forgotten testimony of the FBI's Confidential Source One, as well as other sources, Williams first presents evidence of Osama Bin Laden's purchase of highly enriched uranium in Sudan and nuclear devices from the Chechens and the Russian Mafia. He then offers further information on the workings of Pakistani scientists and technicians from the A. Q. Khan Research Facility to maintain and upgrade al Qaeda's bespoke nukes (with explosive yields in excess of ten kilotons) for the American Hiroshima. This information comes with empirical proof that should dispel any doubts that these weapons not only have been developed but have also been forward-deployed from the seaport at Karachi to strategic locations within the Western world. Keeping the focus on Pakistan, he predicts a nightmarish scenario if President Pervez Musharref should be overthrown and his arsenal of sixty-eight nuclear weapons falls into the hands of radical mullahs. Williams also examines the role of the Iranians both in sponsoring terrorism and in planning the American Hiroshima. In addition, he uncovers many unreported and startling accounts of the terrorist activities of Hezbollah in America and presents evidence that the marriage between Hezbollah and al Qaeda has been

consummated. Finally, he presents intelligence showing that grave threats to America come, not from just our southern border, but from Canada and its amazingly open policies regarding radical Islam. The greatest threat of all, he concludes, comes from within -not only from the radical mosques within every major American city but also the Islamic paramilitary compounds in rural areas throughout the country, including Islamburg in New York State, where new recruits are trained for the great jihad against the United States under the very nose of FBI and Homeland Security officials. Sure to be controversial, this shocking exposé sends a wake-up to Americans lulled into a false sense of security in the post-9/11 era. Paul L. Williams, Ph.D., is a journalist and the author of *Osama's Revenge: The Next 9/11* and *The Al Qaeda Connection*, among other books. The winner of three first-place Keystone Press Awards for journalism, he has also served as a consultant for the FBI, editor and publisher of the *Metro*, and an adjunct professor of Humanities at the University of Scranton. Presently, he serves as Director of Counter-Terrorism for the Christian Action Network.

*Representations* LuMing Mao 2008-11-28 Asian American rhetorics, produced through cultural contact between Asian traditions and US English, also comprise a dynamic influence on the cultural conditions and practices within which they move. Though always interesting to linguists and "contact language" scholars, in an increasingly globalized era, these subjects are of interest to scholars in a widening range of disciplines—especially those in rhetoric and writing studies. Mao, Young, and their contributors propose that Asian American discourse should be seen as a spacious form, one that deliberately and selectively

incorporates Asian "foreign-ness" into the English of Asian Americans. These authors offer the concept of a dynamic "togetherness-in-difference" as a way to theorize the contact and mutual influence. Chapters here explore a rich diversity of histories, theories, literary texts, and rhetorical practices. Collectively, they move the scholarly discussion toward a more nuanced, better balanced, critically informed representation of the forms of Asian American rhetorics and the cultural work that they do.

*Social and Cultural Foundations of Counseling and Human Services* John J. Schmidt 2006 *Social and Cultural Foundations of Counseling and Human Services* addresses the fundamental social and cultural foundations upon which counselors and other helpers develop the knowledge and skill to work effectively with diverse populations. A basic premise of this new text is that such foundational knowledge includes learning about self-concept development within a cultural and sociological context and about the impact that both individual differences and collectivistic philosophies have on cultural and personal identity. It distinctively features a social psychology perspective of diversity, complemented by an understanding of self-concept theory and its interaction with other models of identity development. Highlights of the First Edition: Maintains a balanced perspective on the impact of individualistic and collectivistic philosophies on a person's development.
